# 非洲：仍在崛起？

非洲的经济崛起近期受到一些外部冲击的影响，但长期来看前景依然乐观。

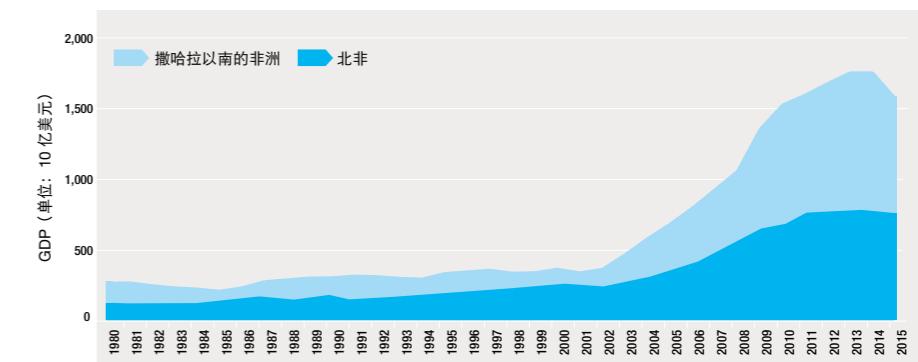

在经历了几十年的低迷后，非洲经济终于在世纪之交开始加速增长。非洲大陆在2000-2014年年均GDP增长率超过5%，主要驱动力来自撒哈拉以南快速增长的经济体。这一阶段，包括《经济学人》在内的期刊和媒体经常用到“非洲崛起”这个词，它成为非洲经济增长的代名词，也增加了关于非洲未来发展的乐观情绪。

然而，非洲经济增长从那以后便开始趋缓，主要是非洲各国受到外部冲击的影响，包括不断下跌的商品价格、中国发展的放缓等。国际货币基金组织预估，非洲GDP增速将在2015年下降至3.4%，在2016年将进一步下降至2.1%；且预估撒哈拉以南非洲GDP增速在2016年只有1.5%。在这一背景下，“非洲是否仍在崛起”的问题被推到了经济讨论的前沿。

## 一个高速增长的非洲

而各大媒体头条所报道的非洲GDP数据其实掩盖了非洲经济多速发展的实质。概括来说，非洲的商品进口国和商品出口国的经济增速自2015年起出现了分化，特别是主要石油出口国受到油价下跌的影响，而石油进

图一  
非洲国民生产总值（美元）

资料来源：世界银行/莱坊精算部

口国的增长率更具弹性。

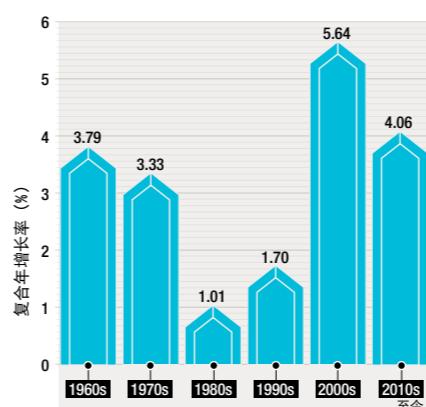

在撒哈拉以南非洲，GDP增长的减缓可主要归因于这一区的三大经济体：尼日利亚、南非和安哥拉。尼日利亚和安哥拉作为非洲最大的两个石油出口国都经历了油价持续走低致使收入严重受创，而这进而又加剧了政府支出、债务水平和汇率压力。

尼日利亚经济在2016年开始衰退，同时国

际货币基金组织预测安哥拉2016年的经济将出现零增长。另一些较小的石油经济国家，如赤道几内亚和加蓬，也受到了商品价格下滑的严重影响。

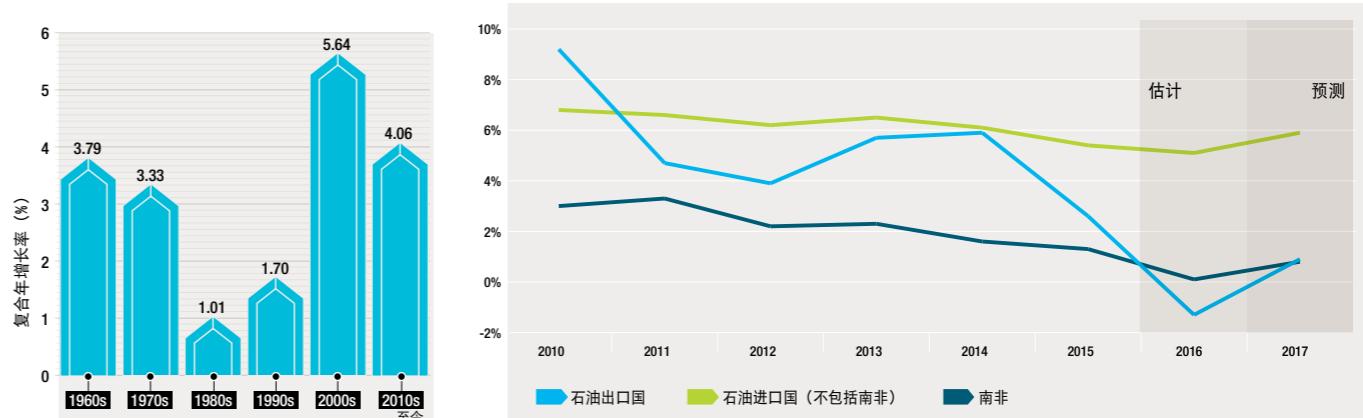

尽管南非是石油净进口国，其经济增长也因采矿业和制造业的疲软而一蹶不振，农业生产也受到旱情的严重影响。南非经济在2016年只能说所幸还没进入衰退。

图二  
撒哈拉以南非洲每十年GDP增速

资料来源：世界银行/莱坊精算部

图三  
撒哈拉以南非洲GDP增速

资料来源：国际货币基金组织

相比而言，东非一些商品进口国，包括坦桑尼亚、埃塞俄比亚、肯尼亚和卢旺达，都保持着5%以上的GDP增长率，这是受益于低油价和个人消费以及投资的增长。西非的科特迪瓦和塞内加尔也作为非洲大陆两个增长最强劲的经济体脱颖而出，这主要得益于政治局面日趋稳定、有效的经济改革和基础设施的大力投资。

与近些年总体经济格局相反，2016年北非地区的GDP增长高于撒哈拉以南地区。然而北非地区各国的增长并不均衡，利比亚和阿尔及利亚均受到了低油价的冲击。

经济多样化和技术改革

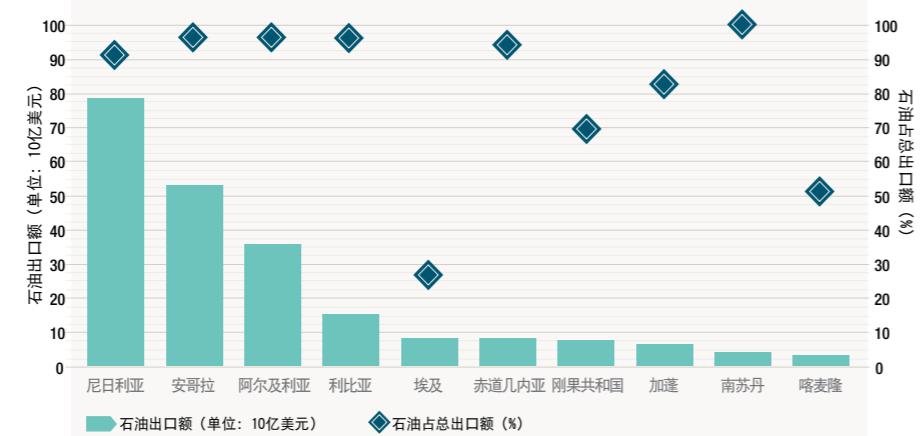

非洲产油国目前的困境更加突出了非洲各经济体多样化的迫切需求，只有这样才能不完全依赖于商品或其他任何单一经济产出源。对许多非洲国家政府来说，加快推进已经开始的经济多样化进程绝对是政府工作的重中之重。

样化的核心。移动通讯技术令大部分非洲人口跨越座机时代而直接使用无线技术，因而对社会经济产生了巨大的变革性影响。这使得非洲消费者快速接受了移动银行和支付服务，对于不方便直接去银行的人们来说扩大了金融服务覆盖面。东非尤其突出，为移动金融服务领域贡献了大量创新成果。根据 Gobal Findex 数据，肯尼亚58%人口都有移动银行账户，处于全球领先地位。

随着非洲消费者已将手中的数码手机换成智能手机，非洲手机市场已进入第二阶段增长。预计到2020年，智能手机将占据绝大部分非洲市场。对更复杂移动技术的采用在塑造消费者行为中发挥了重要作用，也将推动如线上零售等行业的发展。

技术发展会成为非洲经济体未来增长和多

## 2016年非洲GDP增速

资料来源：国际货币基金组织

## 人口增长和城市化

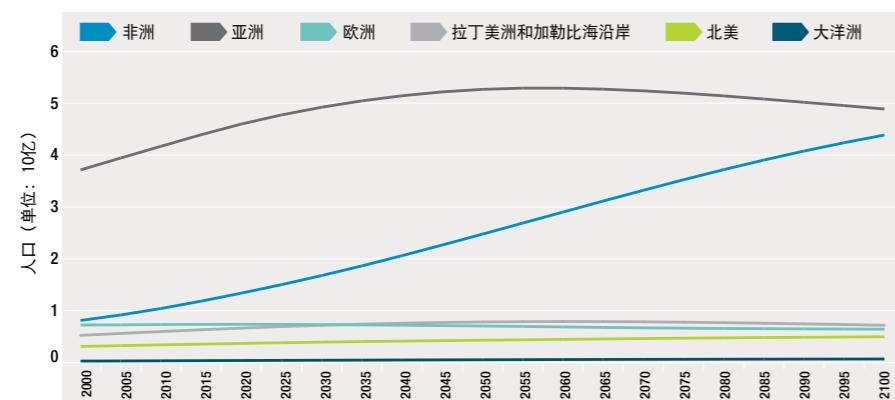

尽管非洲部分国家经济增长放缓，但是非洲人口的增长趋势对其长期发展来说依然是有利的。非洲人口正以高于世界其他任何地区的速度增长，人口相对年轻且日益城市化。

非洲人口在过去30年增长一倍以上，目前已超过10亿人口，且联合国预测这一数字在2100年之前将超过40亿，届时非洲人口将占全球人数的大约40%。随着世界其他地区在未来几十年人口增长将放缓且呈现老龄化趋势，非洲将成为全球劳动力的主力军。据麦肯锡预测，到2034年，非洲工作年龄人口将达11亿，超过中国和印度。

从农村到城市的迁徙大大推动了非洲许多主要城市的人口增长。目前，非洲城市人口以每年1500万的速度增加，且据联合国预测，非洲人口总城市化率将从目前的约40%增长到2040年的50%以上。

除南非以外，人口增长最快的非洲城市几乎都在撒哈拉以南，像坎帕拉、卢萨卡和内罗毕这样的城市人口每年都在4%以上的速度增长，且在未来几十年，越来越多的撒哈拉以南城市将成为千万以上人口的特大城市。根据全球城市研究院（Global Cities Institute）的预测，在本世纪末，拉各斯、金沙萨和达累斯萨拉姆将成为世界三大人口最多的城市。从拉各斯延伸到科特迪瓦首都阿比让的城市密集的海岸，覆盖了1000公里内的最佳地带，为未来成为国际特大城市奠定了基础。

图六  
全球人口预测

资料来源：联合国人口署

人口的飞速增长将会给各市政府带来挑战，加大城市基础设施建设的压力。同时，为了应对人口增长压力，非洲城市将需要大量投资来改造都市环境，这为房地产发展创造了机遇。

撒哈拉以南非洲的经济增长预计在2017年总体上会稍有恢复，且根据国际货币基金组织的预测，该地区GDP增长在2019年会恢复到4%以上。长期来看，本世纪初促使非洲经济增长的众多因素仍将有利于非洲发展，且在全球其他国家人口老龄化背景下，非洲正在壮大的年轻城市人口将成为其最大的财富。

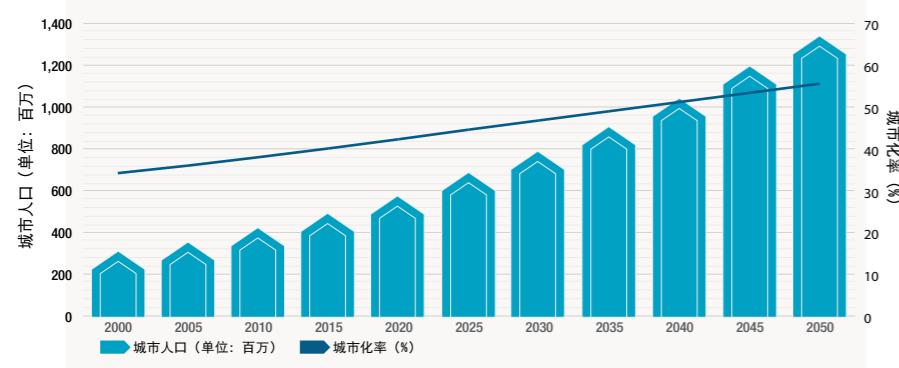

近期一些事件表明，对非洲有兴趣的投资者非常需要对特定市场做详细深入了解，并准确判断进入市场的时机。对于那些有着敏锐市场嗅觉和长期投资规划的投资人，非洲依然提供了不错的机遇。

## 复杂但乐观的前景

随着全球地缘政治格局日趋分化，非洲经济前景似乎更加复杂和具有挑战性。近期发展模式凸显了非洲经济的多样性，各国经济增速的巨大差异将会持续，特别是如果油价无法恢复到一定水平以维持非洲石油出口国的发展。

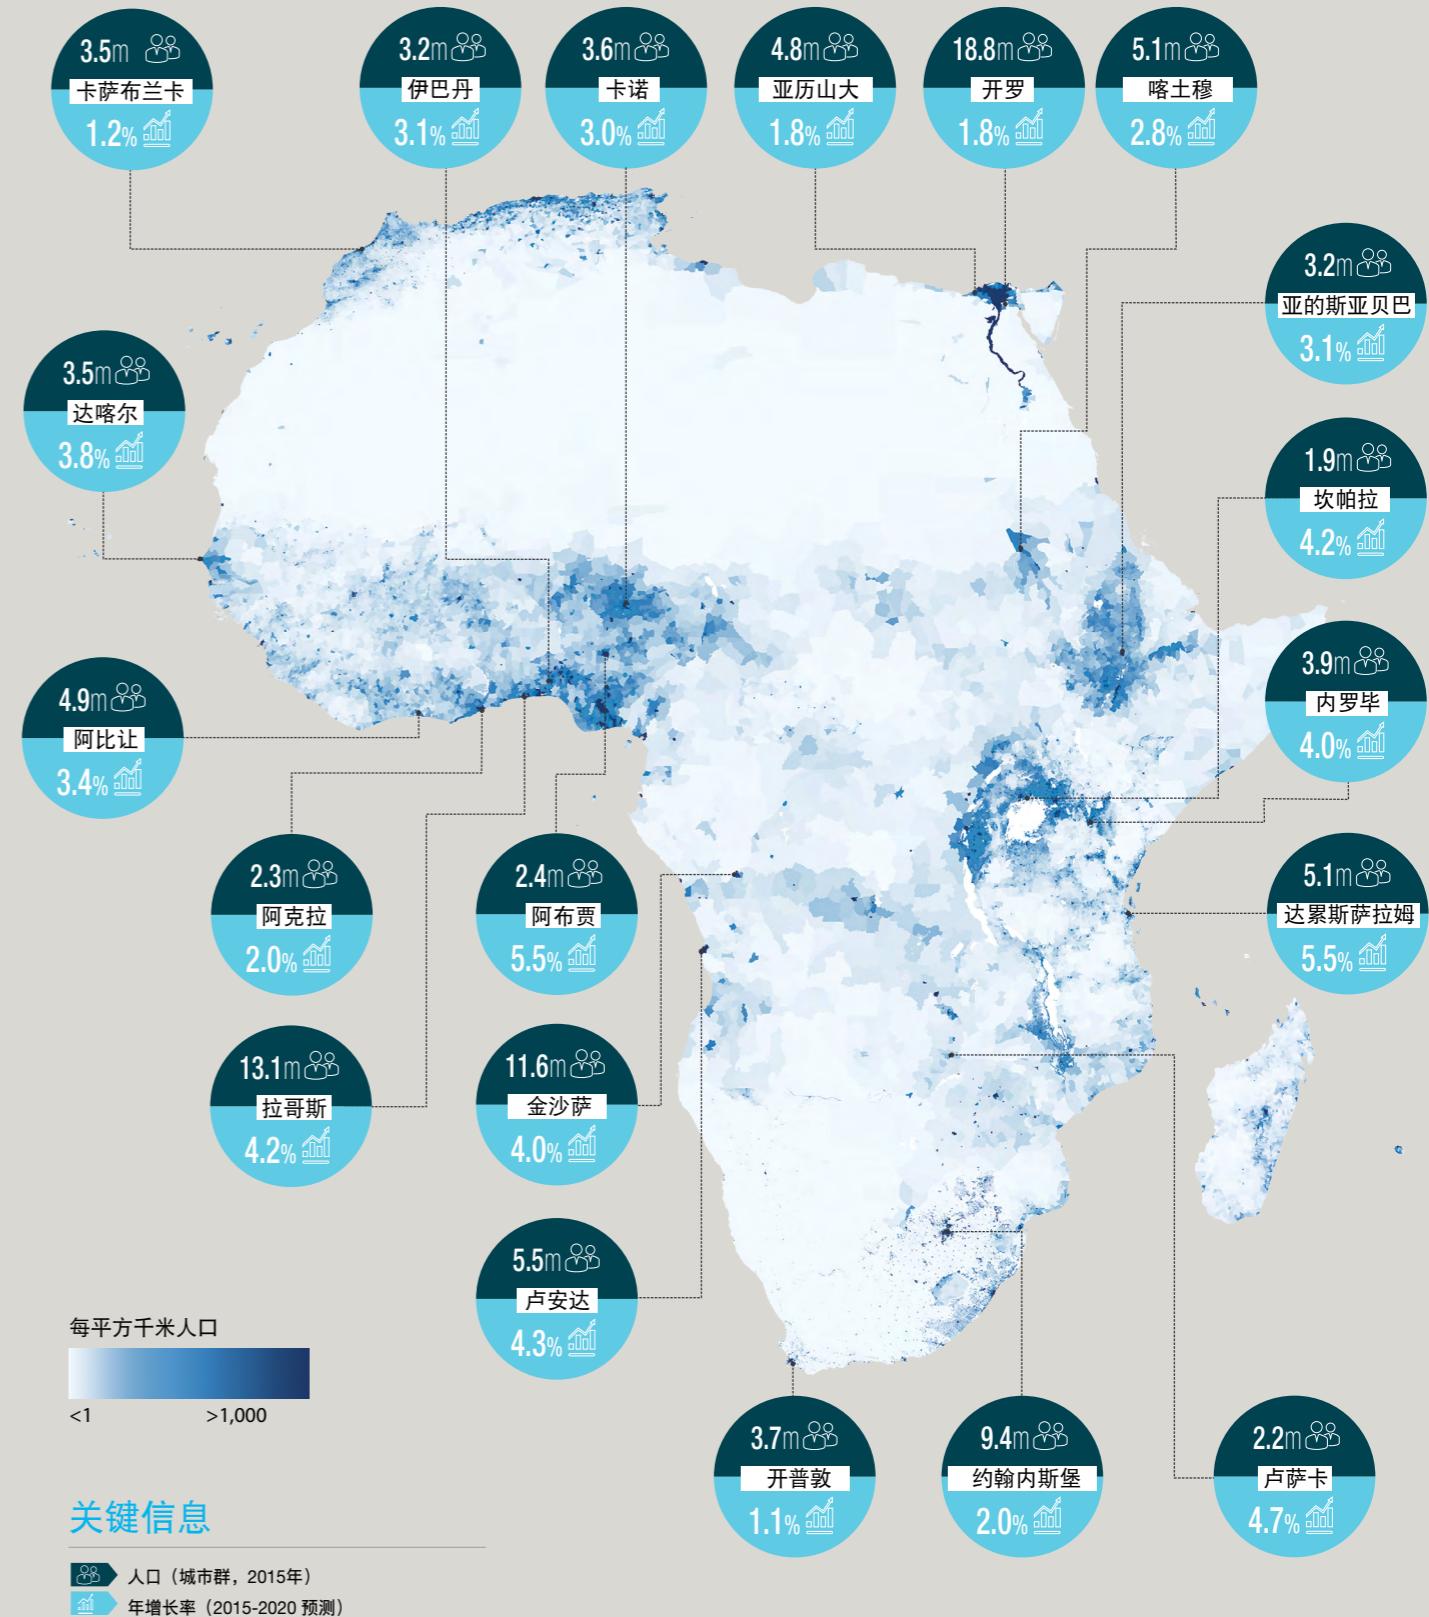

2017年以及未来的经济前景还受到更广泛的国际问题的影响。更多的关注会投向特朗普对非洲的政策，其中一点就是特朗普政府是否会威胁到《非洲增长与机遇法案》贸易协议的未来。而OPEC关于限制石油产量的协

# 资本市场分析

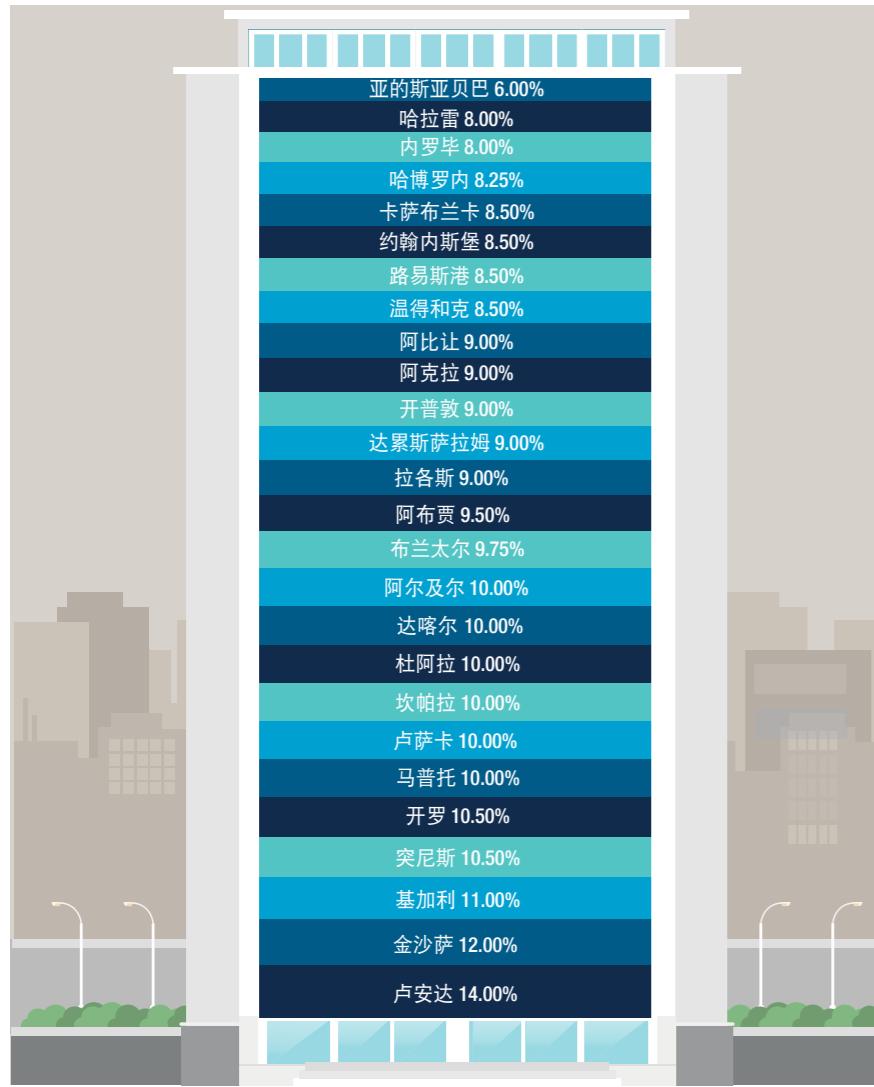

撒哈拉以南非洲房地产投资与开发吸引越来越多的资本。

撒哈拉以南大规模长期投资案例已吸引了越来越多的国际投资者在近些年开始挖掘该地区的投资机遇，尽管有限的投资级别股票和南非以外市场的不明朗环境限制了交易活动。虽然一些撒哈拉以南经济体在过去两年经济疲软，但是该地区房地产投资兴趣依然很高。

2016年，英国的新兴市场专业投资公司英联投资（Actis）宣布筹资5亿美元成立其

第三个非洲房地产基金英联投资（Actis）Africa Real Estate Fund 3，充分显示了投资者对撒哈拉以南房地产市场的兴趣。这是对南非以外撒哈拉以南非洲目前为止投资额最大的私人房地产基金，其中包括来自新加坡政府投资公司（GIC）的投资。英联投资（Actis）前两个基金分别在2006年和2012年关闭，参与了撒哈拉以南非洲大多数现代商业地产的开发，分别在加

图七  
非洲优质写字楼收益

资料来源：莱坊研究部

纳、肯尼亚、尼日利亚和坦桑尼亚。近年来，英联投资（Actis）已退出了其第一批投资中的大部分项目，卖掉了在 Accra Mall, Nairobi Business Park 和 Ikeja City Mall 等项目中的资产权益。十年前当英联投资（Actis）成立其第一个撒哈拉以南非洲基金时，全球房地产资本基本上还未进入这块区域，英联投资（Actis）可谓是先锋。然而当其第三个基金成立时，已处在一个更为拥挤的市场环境，因为一系列大型房地产公司已在近些年瞄准了撒哈拉以南房地产市场。其中许多都是南非企业控制的资金，尽管通常是在毛里求斯注册或上市。

一个典型的例子就是 RMB Westport。该公司在2008年由 Rand Merchant Bank 和 Westport Property Group 合资建立。其目前的开发项目包括拉各斯的 Wings 综合写字楼和罗安达的 Muxima 购物中心。RMB Westport 的第二个基金，目标是筹资4.5亿美元，吸引了来自新加坡政府投资公司和英国投资公司高富诺的资金。

过去两年启动的其他房地产投资工具还包括由 Growthpoint 和 Investec 合资成立的一个泛非洲投资基金，目标筹资5亿美元。Momentum Global Investment Management 和 Eris Property Group 合资成立了2.5亿美元的 Momentum Africa Real Estate Fund 基金，为加纳和尼日利亚的开发项目带来了资金。

英国-南非集团 Old Mutual 通过在2016下半年宣布与尼日利亚主权财富基金 Nigerian Sovereign Investment Authority 合作，发出了其扩大在非洲投资的信号。该合作关系除了一个2亿美元的农业投资工具外，还计划筹集5亿美元的房地产基金。

2016年另一个值得关注的大事是 Mara Delta 的创立，这一房地产基金是由 Delta Africa 和 Mara Diversified Property Holdings 合并而成。Mara Delta 在2016年间是在非洲投资地产最多的买家之一，其资

产组合目前遍布肯尼亚、毛里求斯、摩洛哥、莫桑比克和赞比亚。

南非投资者在非洲其他地区的投资活动反映了一个大的趋势，即这部分投资者越来越多地转投海外市场，以抵御南非货币疲软和经济萧条的不利影响。这还导致了南非投资者将大量资本投向中欧和东欧，主要受到相对较高的收益率的吸引。2016年间，Hyprop、Redefine 和 Tower 在内的南非投资主体在中东欧收购了价值高达21亿美元的房地产。

中东投资者对非洲房地产亦有巨大需求，他们偏好于大规模开发项目，而非直接房地产投资项目。撒哈拉以南受到中东投资支持的项目包括阿联酋公司 Eagle Hills 在尼日利亚首都阿布贾的 Century City 项目。中东投资者还对非洲不断增长的酒店

娱乐房地产颇感兴趣。

在亚洲投资者中，中国向非洲的投资力度最大，此外日本政府也做出巨大努力鼓励向非洲投资。中国投资机构大力出资并积极参与非洲大型基础设施项目的建设，但是有中国企业参与的纯粹房地产投资项目较为少见。有中国投资参与的一些引人注目的大型城市开发项目包括上海正大集团投资的莫德冯顿新城项目，该项目临近约翰内斯堡。另外，中国国有企业中国航空工业集团公司对内罗毕的综合开发项目 Two Rivers 进行了大规模投资。

近期交易表明，在最具吸引力的撒哈拉以南市场，典型的投资级别资产收益率范围在7-9%。尽管在世界其他一些区域罕有优质资产能达到如此高的收益率，但并非所有国际投资者认为这些收益足以抵消非洲

市场的高风险。收益水平取决于市场上极其有限的机构级资产的需求，而且随着近期成立的投资工具不断扩大资金，这一态势很可能持续。

英联投资（Actis）和 RMB Westport 等机构的投资项目将极大增加撒哈拉以南非洲未来五年的投资房产存量，如此一来符合国际机构投资者需求的现成资产也会相应增加。然而，寻求进入非洲市场的国际投资者可能感到，刚开始时追随 GIC 和高富诺的投资线路更为保险，即把资金投向本地区声誉良好的投资者成立的基金，而不是直接进行房地产投资。在筹集资金时，新一批撒哈拉以南房地产基金将把目光投向那些想在本地区拓展业务的国际投资者需求上。

## 2015-16年撒哈拉以南非洲投资交易

日期	物业	地址	物业类别	出售方	购买方	估价 (百万美元)	实际收益
Q4 2015	Ikeja City Mall	尼日利亚，拉各斯	商铺	英联投资（Actis）/RMB Westport/Paragon	Hyprop (75%)/Attacq (25%)	91.0	>8.00%

## 重点物业类别：商铺

撒哈拉以南的非洲现代商铺存量规模继续扩大，质量继续提升。

### 现代购物中心的开发正在改变撒哈拉以南的非洲城市面貌。

零售物业在过去十年一直是非洲开发的重点，让购物中心的概念在越来越多的非洲主要城市遍地开花。零售物业开发的主要驱动力包括非洲大陆消费者市场的发展和国内外零售业的扩张，特别是南非一些主要连锁超市，如 Shoprite, Pick n Pay 和 Game 等。

南非目前是撒哈拉以南最大且最成熟的零售物业市场，购物中心面积约为2300万平方米，而除南非以外的撒哈拉以南地区购物中心总面积仅为300万平方米。南非零售物业市场2016年继续增长，尤其是在 Atterbury 面积达131,000 平方米的 Mall of Africa 建成之后，这是撒哈拉以南地区目前为止最大的单期购物中心项目。

除南非以外，肯尼亚首都内罗毕拥有撒哈拉以南最大的现代购物中心，且内罗毕将继续发展成为一个开发热点。2015年，英联投资（Actis）在内罗毕的 Garden City Mall 项目（33,500平方米）第一期完工，接着是2016年在 Karen 富人居住区 The Hub 项目（3万平方米）的开业。另一个是6.7万平方米的 Two Rivers Mall，已于

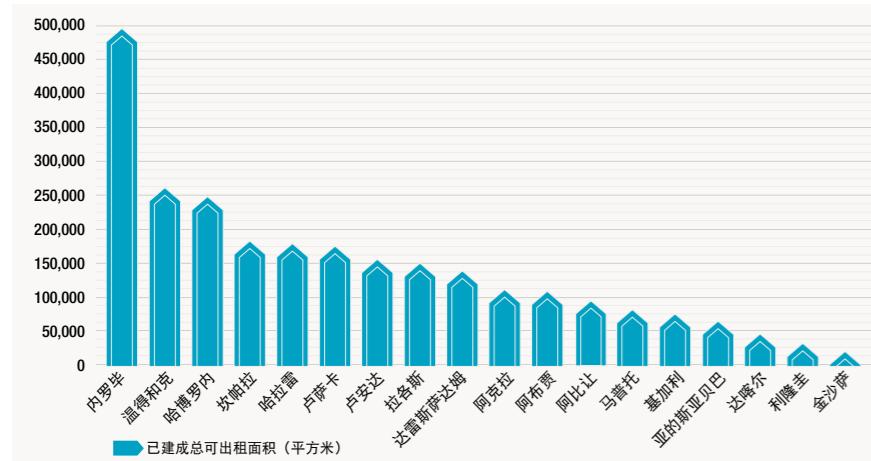

2017年2月开业，目前是肯尼亚最大的购物中心。

在非洲其他地方，包括 Atterbury, Novare, Resilient, RMB Westport 在内的开发商都在过去两年交付了现代购物中心项目，令加纳和尼日利亚也拥有零售物业存量房。科特迪瓦和塞内加尔的乐观发展前景让这两个国家也吸引了更多投资兴趣，一改之前现代零售物业开发项目较少的局面。值得一提的是，CFAO 在阿比让的投资项目 Playce Marcory 开业，这是其计划开设的中西非一系列以家乐福为主的购物中心的首个项目。

撒哈拉以南有大量的现代零售物业项目正在规划筹建之中，尽管石油经济体的衰落导致了一些项目的延期或规模缩小。由于这一地区的大部分首都都有至少一个购物中心，开发商开始更多地把目光投向二线城市，以在这些地区获占据先机。也有迹象表明，一些较为实际的开发商正在重点开发地段好的中小型便利购物中心，而非地区性的大型购物中心。

随着零售业的发展和零售物业项目的竞争日益激烈，开发商将寻求通过吸引国际品牌入驻、增加娱乐设施、提升顾客体验等手段来使其购物中心脱颖而出。对于新的购物中心项目而言，合适微区位的选择对项目成功至关重要，特别是在已有兴旺购物中心的城市。现代购物中心的开发将对塑造非洲发展中城市的未来格局发生重大作用。

## 购物中心和开业时间

2015-2017年第一季度

# 重点物业类别： 物流用途物业

物流用途物业日益成为新开发项目的关注点

在过去十年，撒哈拉以南的现代商业地产开发绝大部分集中于零售物业和写字楼，而物流用途物业开发相对较少。现在人们越来越意识到该地区主要城市的现代物流空间供不应求。随着零售商和消费品生产商寻求扩大非洲业务并改善配送网络和供应链，目前该地区的物流用途物业开发正如火如荼地进行。

2016年开业的新项目包括赞比亚首都卢萨卡的 York Commercial Park 和加纳特马港的 Agility Distribution Park。这两个项目都提供了按需定制的物流单元，为这些地区带来了空前的优质物流空间。加纳的这一项目是科威特开发商 Agility 计划在非洲建造的一系列物流用途物业的首个项目，其他的目标市场还包括安哥拉、科特迪瓦、莫桑比克、尼日利亚、坦桑尼亚。

作为更大范围城市开发的一部分，一些大型物流和工业园区项目正在规划筹建之中，其中包括 Rendeavour 在内罗毕附近

开发的 Tatu City 项目和卢萨卡的 Roma Park 项目。由于非洲国际贸易主要依赖于海运，这意味着港口是企业物流网络的关键点，因此港口附近也是物流开发的热点。其中，迪拜开发商 DP World 在非洲港口和相关物流用途物业的开发运营方面尤为活跃。

一些颠覆性技术将塑造非洲物流用途物业的未来。例如，无人机可能帮助物流运营商克服非洲运输设施的不足，在没有可靠公路网络的地区也能配送货物。2016年，美国公司 Zipline 在卢旺达开启了被认为是全世界第一个商业无人机配送服务。

线上零售的兴起也将今后塑造物流用途物业市场。非洲线上零售业尽管在全球来看规模还相对较小，但已开始迅速发展，主要受到智能移动设备广泛使用的推动。领先的线上零售商如尼日利亚的 Jumia 和 Konga 正在建设新配送网络，而这需要更完善的物流用途物业配套。

## 达喀尔自由贸易区

达喀尔, 塞内加尔

DP World 已和塞内加尔政府达成协议，在塞内加尔郊区的布莱斯·迪亚涅新国际机场开发一个物流自由贸易区。

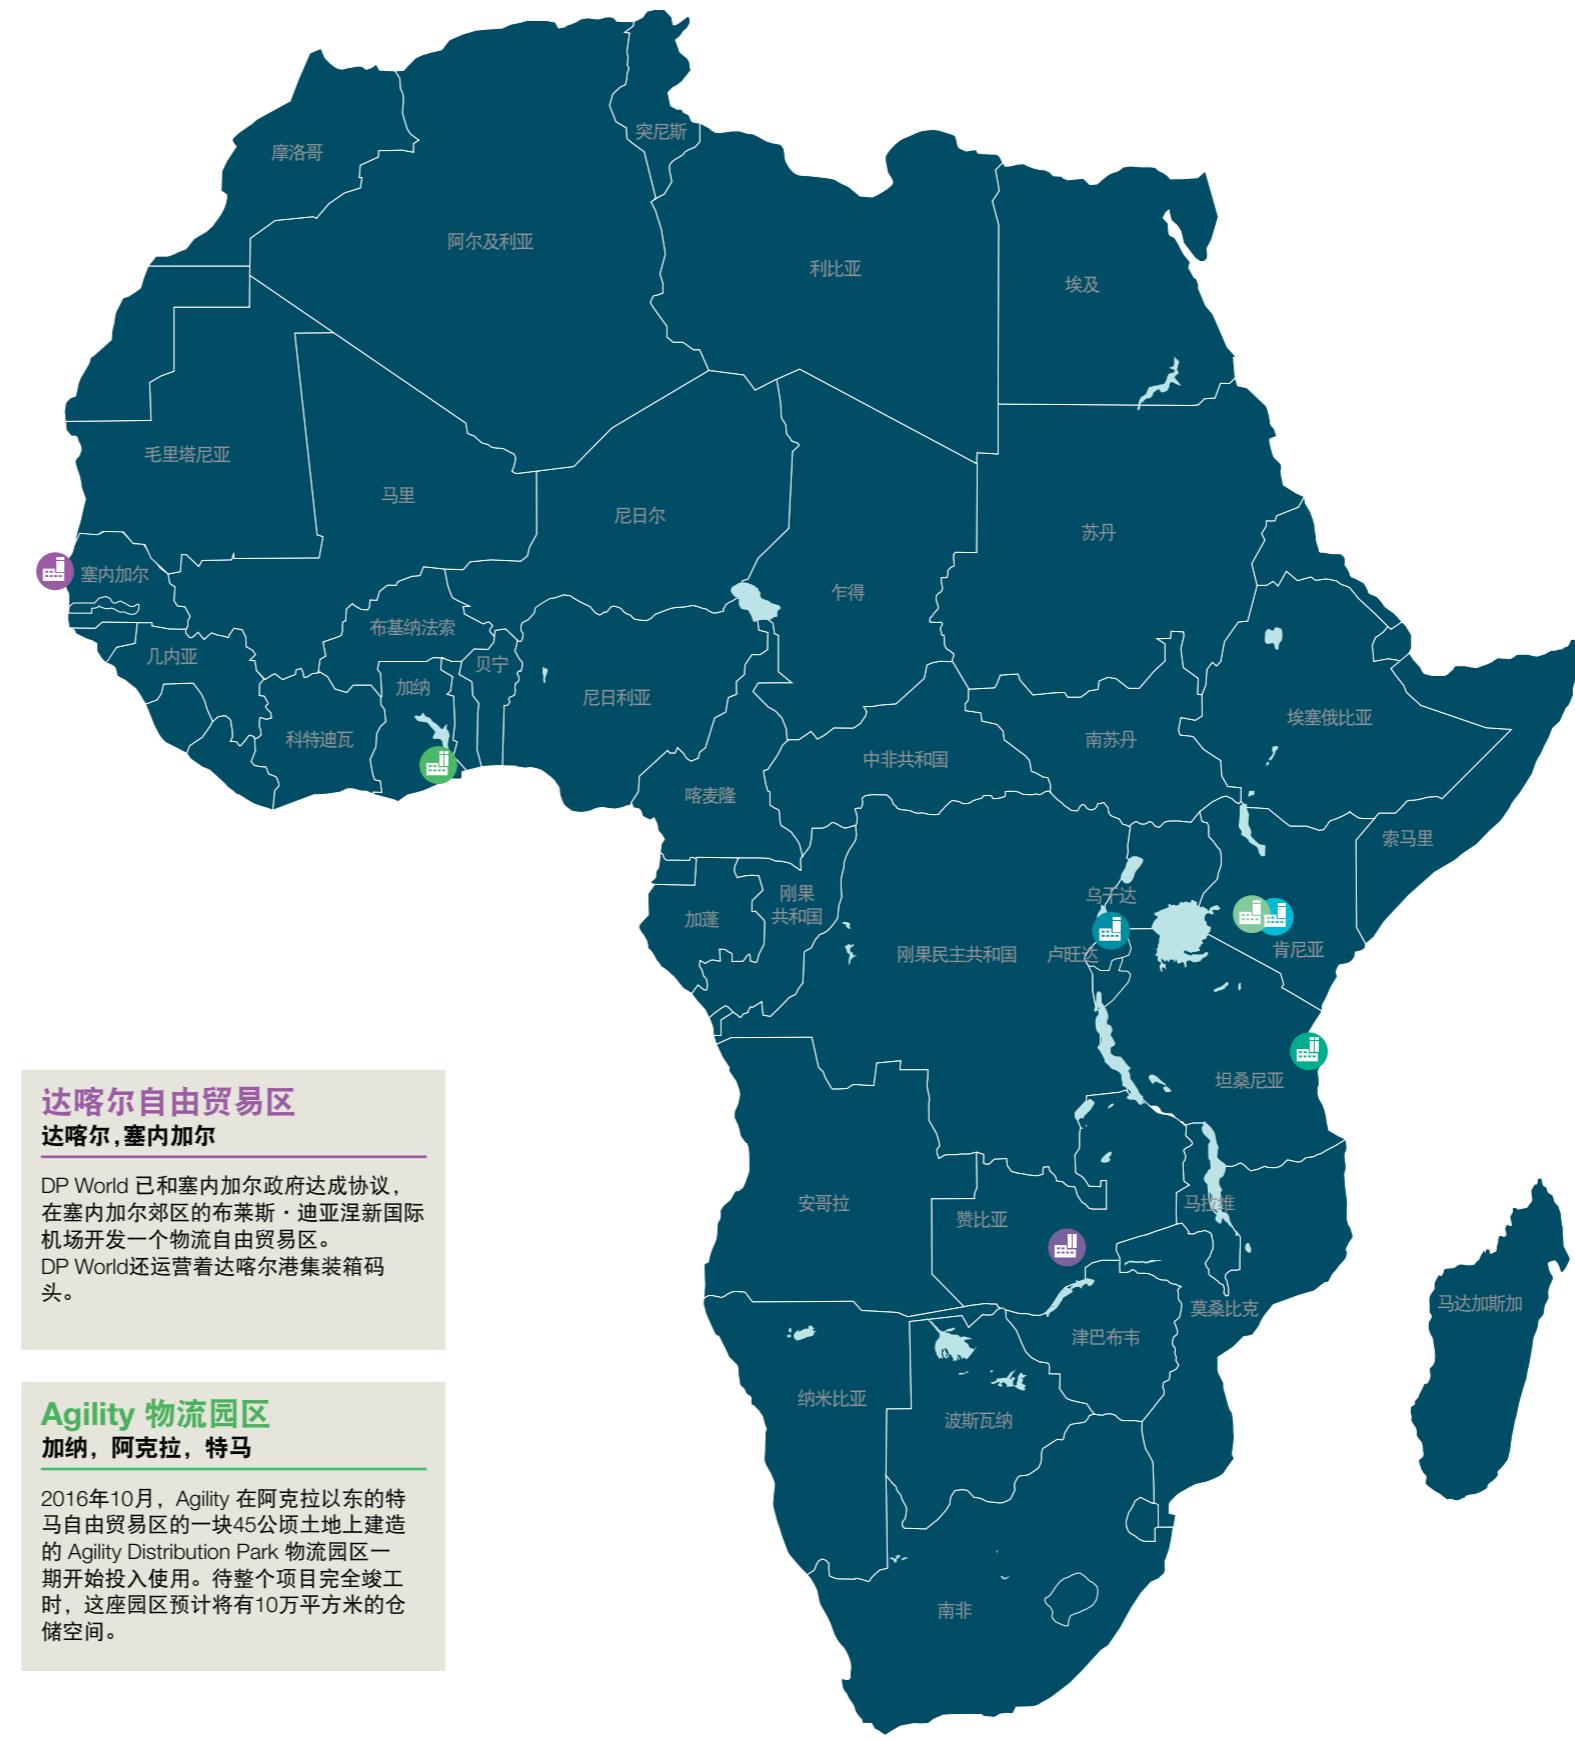

DP World 还运营着达喀尔港集装箱码头。

## Agility 物流园区

加纳, 阿克拉, 特马

2016年10月，Agility 在阿克拉以东的特马自由贸易区的一块45公顷土地上建造的 Agility Distribution Park 物流园区一期开始投入使用。待整个项目完全竣工时，这座园区预计将有10万平方米的仓储空间。

# 物流用途开发项目

## 非洲物流用途物业

肯尼亚, 内罗毕

非洲物流用途物业 (ALP) 是由东非投资集团 Maris 所主导的投资基金。ALP 计划筹资6500-7000万美元，包括来自世界银行国际金融公司的投资，用以在内罗毕周边开发物流园区。

## CoastDryport

坦桑尼亚, Soga

美国 BlackIvy 集团计划在达累斯萨拉姆以西的 Soga 村开发一座无水港和国际联运物流园区。两条铁路线将专门服务于这一500公顷的园区。

## 基加利物流平台

卢旺达, 基加利

DP World 获得特许权在基加利开发和运营一座新物流中心。一期工程将建在9万平方米的土地上，其中包括1.2万平米的集装箱区和1.96万平米的仓储设施。

## 塔图工业园

肯尼亚, 内罗毕

塔图工业园作为塔图市城市开发项目的一部分，包括450公顷的基础设施覆盖面积，适合轻工业、仓储和物流。联合利华已签订协议购买该园区70公顷的土地。

## 约克商业园区

赞比亚, 卢萨卡

英联投资 (Actis) 与南非开发商 Improvion 正在卢萨卡南部联合开发一座现代物流园区。园区一期在2016年初竣工。

# ALGERIA

## Office market

The traditional office locations in Algiers of Hydra and the city centre generally remain the prime areas for local businesses. However, international corporate occupiers with larger requirements have tended to shift eastwards towards the airport and the new commercial districts of Bab Ezzouar and Alger Medina. Banking, in particular, is largely no longer headquartered in the city centre, with Natixis, BNP Paribas, Citi and HSBC all now out to the east. Trust Bank and Al Baraka Bank also have new headquarters under construction in Bab Ezzouar. The office market has been subdued over the last year as a result of economic uncertainty and many of the largest construction projects have made slow progress. However, prime rents have been stable, as the availability of space suitable for international occupiers remains limited.

## Retail market

The informal retail sector is still predominant in Algeria, but a series of modern retail developments have emerged over the last decade. The first of these was Sidar's Al Qods in Chéraga, which has since been joined by SCCA's Centre Commercial Bab Ezzouar, Arcofina's Ardis-Medina Center and Chaibi/Asicom's City Center. These shopping centres are all performing well in terms of occupancy and footfall, although Algeria's current economic challenges are likely to slow further development. Carrefour has recently re-entered Algeria but the requirement to form a joint venture with local partners is an inhibitor to the market entry of other international retailers.

## Industrial market

Algeria's oil-dependent economy is currently depressed and attempts to diversify the economic base have had only limited success. It is anticipated that the government will increase taxes and subsidised fuel prices in 2017, targeting businesses more than individuals. This will negatively impact Algeria's appeal as a manufacturing location and discourage international investment, which is already deterred by restrictions on foreign ownership. There are several major industrial zones around Algiers including Rouiba, Ouled Fayet, Birtouta and Dar El Beïda/Oued Smar; these are all practically full and it is difficult to find good quality real estate. There is a pharmaceutical/biotechnology cluster at Sidi Abdallah, 30 km south west of Algiers, where Sanofi is building a factory.

## Residential market

The prime residential area of Algiers is Hydra, which is also the main area of the city for the diplomatic sector. The upmarket housing market has slowed in the last two years and rents have fallen, with the potential for further decreases due to the depressed economic conditions. Lease renewals are being agreed without review or at discounts to previous levels. The Finance Act 2017 has raised taxes on landlords' rental incomes, impacting the attractiveness of residential investment. There is strong potential demand for affordable housing and government initiatives have attempted to encourage investment in this sector.

BESA Headquarters, Luanda

# ANGOLA

## Office market

Falling oil prices have had a dramatic impact on Angola's oil-dependent economy and the real estate sector. Office demand in Luanda has virtually ground to a halt and supply has increased, causing vacancy rates for new buildings to rise above 20%, with further increases expected in 2017. Luanda still has the highest office rents in Africa, but Grade A rents have almost halved in the last three years. The market has also been affected by recently-introduced legislation prohibiting real estate rents from being set in, or linked to, a foreign currency. This has badly impacted landlords who have typically borrowed in US dollars but are now receiving their revenues in kwanza.

## Retail market

The retail sector in Luanda remains at a nascent stage of development, with the majority of activity being either informal trading or in standalone units. International retailers, who were looking at the market in 2013-14, have all but disappeared. However, local investors have promoted the expansion of the mall operator Xyami, which is rolling out retail centres in Luanda and other Angolan cities. There are currently fourteen shopping centres in Greater Luanda, mainly concentrated in the downtown and Talatona, where many expatriates live. There has been a lack of open market transactions, but anecdotal evidence suggests that rents have fallen by around 50% since 2014.

## Industrial market

Luanda's main industrial and warehousing locations are in and around the port area and Viana to the east of the city. Historically, it has been very difficult to find good quality warehousing in Luanda, but the drop in demand from the oil sector and an increase in supply has caused the market to become more balanced. Rents and values have fallen by 30-50% in the last couple of years. In the short-term, the market is expected to remain stable, but values should increase once the economy recovers and government initiatives to promote diversified industries have an effect.

## Residential market

As is the case in other real estate sectors, high-end residential apartments and villas in Luanda are the most expensive in Africa, despite a 30-50% fall in prices in recent years. Unlike other sectors, residential values were already in decline before the drop in oil prices, due to increased levels of new supply in 2013-14. The prime residential market is dominated by the expatriate community, who generally look to rent rather than buy. A four-bedroom villa on one of the most sought-after compounds in Talatona can still fetch US\$15,000 per month, but in 2014 the same villa would have achieved US\$25,000 per month. Despite the weaker rental market, yields have actually hardened slightly, as investors have bought real estate to hedge against inflation and the devaluation of the kwanza.

# BOTSWANA

## Office market

Office supply continues to outstrip demand in Gaborone and this imbalance is likely to worsen for secondary space. With several large CBD office towers due for completion in 2017 and government departments set on moving to new CBD buildings, older and poorly located offices will be left empty with little expectation that they will be taken up by the private sector. Fairgrounds Office Park remains the decentralised location of choice, with rents around 20% lower than in the CBD. Despite the perceived oversupply, several occupiers with requirements for 500-1,000 sq m are unable to secure appropriate accommodation in the new CBD buildings, and many high-rise towers with smaller floor plates do not suit corporate occupiers.

## Retail market

The retail sector continues to see new development, but demand for space has waned, with few new market entrants and existing businesses contracting in response to weak consumer spending. Historically, mall developers have targeted South African chains, who were able to obtain exemptions to legislation that limits the granting of certain trading licenses to local businesses. However, a hardening of the government's stance meant that South African retailers were unable to obtain exemptions throughout 2016. If this situation persists, it will deter the development of new malls and landlords will have to target Botswana-based tenants, who generally occupy smaller shops of less than 200 sq m.

## Industrial market

Demand for industrial space is focused on units of less than 500 sq m, as tenants have started to use newly built business space as cheaper quasi-offices or showrooms. The lack of strict planning controls within industrial areas has enabled this trend. For new warehouses under 200 sq m, rents are now as high as 50 pula/sq m/month, close to half the level of fully-fledged offices. Demand for larger space is dominated by quasi-retailers seeking prominent properties with good visitor parking. With Botswana reaching 50 years of independence in 2016, many 50-year Fixed Period State Grant (FPSG) leases are nearing expiration and industrial property owners are anxious to see how the state treats requests to renew FPSG leases.

## Residential market

Gaborone has a diminishing supply of low-to-middle income housing, with most people on average incomes finding it difficult to locate affordable housing or finance their own self-build homes. The drift to smaller and cheaper properties has been reinforced by an increased number of single-family households due to growing student and elderly populations. Many residential buy-to-let investors are struggling to find tenants, particularly as expatriate workers have found it difficult to renew work permits. Demand for multi-residential housing has increased and developers are increasingly tailoring schemes to the demands of average local buyers and tenants. Sales at the high end of the market are far less frequent and likely to stay muted for some time.

New office development, Yaoundé

# CAMEROON

## Office market

Cameroon has some significant advantages, having a good education system that produces high quality employees and being both English and French speaking. However, a challenging business environment has held back the development of its office market. There are hardly any good quality office buildings and rents are flat. Douala is the main commercial city, while the capital Yaoundé has a much smaller corporate market which generally accommodates businesses that need access to government departments. Office development has tended to be by local individuals and businesses and is below the standards required by global corporate occupiers.

## Retail market

There are only a small number of international retailers present in Cameroon and most of these, such as Casino and City Sport, are operated as franchises. Until recently, there were no malls in Cameroon but Douala has lately seen the opening of L'Atrium, anchored by Spar, and Kadji Square, which has a Super U hypermarket. The largest retail spaces in Yaoundé are mostly supermarkets or general stores such as Casino, Mahima and DOVV. CFAO/Carrefour have targeted both cities, and are most likely to open first in Douala, possibly as a standalone supermarket rather than a mall-with-supermarket format.

## Industrial market

As the location of Cameroon's main port, Douala is the country's principal

industrial centre. However, there is also significant development activity further south around Kribi, where a new deep-water port is under construction. The country is rich in natural resources with significant industrial-scale agriculture including rubber, palm oil and coffee. The stability of the local currency, which is pegged to the Euro, is an advantage, as is Cameroon's geographical position and the potential to sell into the landlocked countries of Chad and the Central African Republic. However, road networks are relatively poor, which creates distribution challenges, and there are persistent delays and other issues associated with moving products through the port.

## Residential market

Almost half of Cameroon's population lives in informal dwellings, and there is a housing supply deficit estimated to be the equivalent of 100,000 units per year. This will be compounded in future years as the middle class swells and due to diaspora demand. It is very difficult to get financing unless you are a government employee, with funding mainly available through the government agency, Credit Foncier de Cameroun. With supply lagging demand, house prices are increasing, particularly at the mid-to-top end of the market where financing is a less important consideration. The best residential zones in Douala are Akwa, Bonapriso and Bonamoussadi. In Yaoundé, the prime areas are mainly around Centre Ville, Quartier du Lac and Bastos/Golf.

# CHAD

## Office market

Recent construction activity in N'Djamena has largely related to hotels and ministries, rather than commercial offices. There is a large area of the city which has been designated as the Cité Internationale des Affaires, but it is unclear if this will present opportunities to corporate occupiers and, if it does, this will not happen for several years. The city's office market is basic, and purpose-built offices are generally not suitable for international companies. As a result, such operations often work out of hotels and apartments where rents can be very high at XAF30,000/sq m/month-plus. However, the local rate for offices is around one-third, or less, of this. The US Embassy's relocation to Dembé/Chagoua is likely to spur the movement of other administrative functions to this area of the city.

## Industrial market

Chad is consistently ranked as one of the most challenging countries in the world in which to do business. As a landlocked country with a relatively small and low-income population, Chad is not a target market for international manufacturers, and activity mainly involves local businesses involved with agri-processing. In N'Djamena, industrial activity is mostly concentrated around Farcha where some of the oil companies have bases. There is significant oil activity in the south and west of the country, where ExxonMobil has large operations. However, the government has a history of tense relations with foreign oil companies and it recently imposed on ExxonMobil a fine equivalent to seven times the country's GDP for the alleged non-payment of taxes.

## Residential market

N'Djamena saw a surge in the development of high-end villas and hotels in the run-up to the 2015 African Union summit, including a 60-villa compound at Sabangali, and a residential development alongside the Ledger Plaza hotel. However, the summit was cancelled due to the country's economic crisis and, since then, construction activity has almost entirely halted. At the top end of the market, property is generally developed for owner-occupation or for leasing to expatriates. The expatriate leasing market is currently dominated by the diplomatic sector as oil companies have downsized operations. Prime residential rents are around XAF1.75-2.5 million/month, which is slightly down on a year ago, and the market is generally stagnant.

## Retail market

There are no international retailers in N'Djamena, and the formal retail market largely comprises small supermarkets selling imported products. Supermarket brands include Modern Market, Alimentation Générale and Alimentation La Tchadienne. The most significant retail and commercial street in the city is Avenue Charles de Gaulle. In early 2016, N'Djamena's first mall opened opposite the Cité Internationale des Affaires, anchored by a 2,600 sq m Modern Market. However, this is still a fairly basic development by international standards, being essentially ground floor space under apartments.

PlaYce Marcy, Abidjan

# CÔTE D'IVOIRE

## Office market

The leasing of Green Buro in Cocody Ambassades in early 2016, to tenants including GE, Pfizer and ExxonMobil, established a new benchmark for prime rents in Abidjan of XOF17,000/sq m/month. This confirmed Abidjan as the market with the fastest rental growth in Africa over recent years. Several new office developments have been announced by international developers, notably Actis' Renaissance Plaza project in Plateau, but no significant new supply will come to the market until at least 2018, putting further upward pressure on rents. Development tends to be focused on Plateau, which is the established CBD where skyscraper construction is permitted, but many international companies prefer Marcory and Cocody.

## Industrial market

Much of Abidjan's industrial activity is located in areas to the south of the lagoon near the port, such as Vridi, Zones 3 and 4, and Koumassi. These traditional industrial areas are essentially at full capacity. Occupiers are either in legacy real estate or need fast access to the port for import/export activity. To the north of the lagoon, the most important industrial zone is Yopougon, where the majority of businesses are larger users processing local products. International companies in this location include Nestlé and Cargill. Further north, Heineken and CFAO are building a new brewery on the road to Yamoussoukro, which will open in 2017 and give some critical mass to the proposed PPP-funded PK24 industrial zone.

## Residential market

Upmarket residential development tends to focus on Zone 4/Brietty to the south, and Cocody and the Rivieras to the north. Recent years have seen the development of a significant volume of luxury apartment buildings, and this trend is continuing. The market was boosted by the return of the African Development Bank to Abidjan in 2014, but with the bank now starting a process of "decentralisation", high-end residential demand may be negatively impacted. Increased development outside of Abidjan is being encouraged by improvements to roads and other infrastructure. Most of this is at the affordable end of the market, with small plots being bought for the construction of owner-occupied housing, but there has also been a significant amount of speculative activity.

# DEMOCRATIC REPUBLIC OF THE CONGO

## Office market

Office development accelerated after the presidential elections in 2011, but market activity has more recently slowed due to uncertainty caused by the postponement of the next elections from 2016 to 2017. New occupiers entering the Kinshasa market are rare, resulting in weak demand for the space that is currently available. The prime area for offices is in the north of the city, with many of the most prominent buildings being along Boulevard du 30 Juin. International companies with a presence include Ericsson, Orange, Citibank, Elf, Vodacom, Nestlé and Alcatel-Lucent. Most of these have offices in Gombe, which is regarded as the most secure area. Office buildings in Kinshasa are generally of a poor standard and many lack air conditioning or elevators.

## Retail market

The Kinshasa retail market has shown limited progress in recent years. The 10,000 sq m Le Premier Shopping Mall opened on Avenue de la Justice in 2016, while Conimmo has plans to build the 32,000 sq m City Mall in Gombe. However, the massive and unfinished Gare Centrale mixed-use development provides a reminder of the difficulties of developing in Kinshasa. Shoprite is the only major international retailer in Kinshasa, having a supermarket on Avenue de l'OUA. Rents for ground floor retail space are at a similar level to office rents, highlighting the immaturity of the sector as a higher value is attached to ground floor retail units in more advanced markets.

## Industrial market

Historically, prime industrial property has been located in the city centre and Gombe, resulting in relatively high rents. However, more recent development has generally occurred in the east of the city, in areas between the port and the international airport. Industrial property is clustered around the Route des Poids Lourds, particularly in Kingabwa and Limete. Medium and large industrial properties are generally owner-occupied, there is little speculative development, and the leasing market mostly comprises basic second-hand units. Industrial rents in the newer areas drop by as much as 50% compared with the city centre. Much of the centrally-located industrial space can be expected to be gradually converted to office or residential use.

## Residential market

With security concerns becoming more acute, residential values have risen dramatically in the parts of Kinshasa regarded as being safe. There has been a significant volume of apartment development, but the availability of standalone houses in good, secure locations remains limited. The best residential areas are generally in the north of the city and include Gombe, Kintambo, Binza, Lingwala and Barumbu. A number of relatively small developments targeting expatriates have been completed in recent years, and these have been successfully leased. Prime rents are in the region of US\$10,000/month, but drop off dramatically outside of the safe areas.

Maadi Technology Park, Cairo

# EGYPT

## Office market

the currency devaluation will have on consumer spending. No new malls were delivered to the Cairo market in 2016, and the opening of the massive Mall of Egypt (165,000 sq m GLA) was put back to 2017. Prime rents for small retail units can be in excess of US\$100/sq m/month, but rates for larger units are typically in the order of US\$50-70/sq m/month.

## Industrial market

The Industrial Development Authority continues to control and promote new industrial activity in Egypt. It owns significant areas of land which are available for sale or lease. Land in outlying areas such as Upper Egypt may even be offered free, while in other areas land is available at discounted rates. Rents for industrial buildings are in the region of US\$2/sq m/month, and for warehousing are in the range of US\$3-3.50/sq m/month.

## Residential market

Developers have reported good take-up of residential units in high quality new developments, although to some extent this reflects the release of a decreased number of units to the market. High-end residential development is primarily focused on 6th of October City and New Cairo. The devaluation of the Egyptian pound will create issues in this sector as developers face increased costs in local currency terms and, as a result, may seek to increase local currency prices.

# EQUATORIAL GUINEA

## Office market

Office demand in Equatorial Guinea has historically been primarily driven by the construction and energy sectors. The country has a history of big "statement" infrastructure projects such as the Malabo II urban corridor and the Sipopo luxury resort, and work has begun on the construction of a new capital city at Oyala on the mainland. The construction industry has been hit by reduced government spending resulting from lower oil revenues. The oil and gas sector has also contracted, generating muted office demand. However, the market's few major office landlords are debt-free and able to cope with vacancies, so rents are likely to decrease less rapidly than would be expected in other markets with similar supply/demand dynamics.

## Retail market

The retail market in Equatorial Guinea is limited in size, reflecting the country's small population, much of whom live in extreme poverty with wealth being concentrated in the hands of a very small minority. There are medium-sized supermarkets alongside local markets and street trading. Supermarkets used by expatriates in Malabo include EGTC, Martinez Hermanos, Supermercado Santy and Supermercado Muankaban. These stores are well stocked with international goods but are very expensive, as almost everything has to be imported. There are plans for the construction of larger retail developments including the 12,000 sq m Sipopo Mall.

## Industrial market

Equatorial Guinea was one of the fastest-growing economies in the world in the first decade of the 2000s, with its success resting on a string of oil and gas discoveries. Almost all industrial activity relates to the oil and gas sector and, to a lesser extent, agriculture and timber. Industrial activity is focused around KM5, a purpose-built transit-port for oil-related cargo, and the massive liquefied natural gas (LNG) facility at Punta Europa. There has been a drive to relocate some oil and gas activity across Bioko Island to Lonrho's Luba Freeport, where there has been significant purpose-built construction and real estate speculation.

## Residential market

Equatorial Guinea has the highest GDP per capita in Africa, but its wealth belongs to a very small section of the population. Wealthy individuals have channelled a significant amount of capital into residential real estate development and there are some good quality apartment blocks to the west and centre of Malabo. The oil and gas sector drives expatriate demand, and recent falls in oil prices have thus had a significant impact on activity. There does, though, remain a reasonable market for serviced apartments and compounds catering for oil workers in transit to and from offshore operations. There has been some mass house building at developments such as Buena Esperanza on the outskirts of Malabo, but it is debatable if this is truly affordable to most locals.

## Key facts

<b>Population</b>	0.8 million
<b>Major cities:</b>

Zefmesh Grand Mall, Addis Ababa

# ETHIOPIA

## Office market

As a location for international companies, Ethiopia is restricted by its investment code, which prohibits foreign investment in the banking, telecoms and financial services sectors. Nonetheless, office demand is relatively strong in Addis Ababa and buildings generally have high occupancy rates. Most offices are in mixed-use buildings, few of which would meet the quality or health and safety standards required by international corporate occupiers. The traditional locations for upscale offices in Addis Ababa are in Bole Road, Bole Medhanealem/Cameroon Street, Kazanchis and La Gare/Mexico. Investment yields can be very low as there is strong demand from wealthy locals who are subject to restrictions on the transfer of money outside Ethiopia and have few alternative investments available.

## Retail market

The Ethiopian retail market has significant growth potential but its development is fundamentally restricted by the fact that foreign investment is not permitted in this sector. Modern retailing in Addis Ababa is still in the early stages of development compared with other countries in the region. The most prominent supermarkets, such as Shoa and Bambis, are local companies operating from medium-sized stores. Addis Ababa has several small and medium-sized malls, including Zefmesh Grand Mall, Medhanealem Mall and Friendship City Centre, which all generally operate at around 100% occupancy.

## Industrial market

There is a growing market for consumer products in Ethiopia which has encouraged the market entry in recent years of firms such as Diageo, Heineken, SAB Miller, Duet Group, Tiger Brands and Unilever. However, the manufacturing real estate market is not well developed. The most developed areas and locations with future growth potential are generally found within 100 km of Addis Ababa, to the south of the city and along the new Addis Ababa-Djibouti railway. The only two major new industrial parks are at Bole Lemi, which is mainly used for clothing production, and Dukem/EIZ. While it is possible to construct on a standalone basis, this generally has to be in locations without good infrastructure and requiring land purchases from multiple parties. However, Heineken has successfully achieved this at Akaki Kality.

## Residential market

The best locations in Addis Ababa for high-end apartments are in Bole and Kazanchis. Old Airport is also a good residential area, which mainly comprises villas. The market has been buoyant, with high-end apartments mainly being sold off-plan and during their construction periods. Most schemes have been on a relatively small scale, but there are now also some decentralised mega-schemes such as Poli Lotus and Royal Garden. While availability is likely to increase and the market is expected to slow a little, a flight to quality is anticipated and the prime market will remain strong. At the top end of the apartment market, purchases are mainly made for investment.

# GABON

## Office market

Across all sectors, the property market in Gabon has been affected by economic and political uncertainty over the last 12 months. Declining oil reserves and depressed oil prices have led to reduced government spending and an increased focus on the non-oil economy. The results of presidential elections in August 2016 were disputed leading to political unrest. Office rents in Libreville are currently coming under downward pressure, primarily due to significant volumes of new space being either recently completed or close to completion in and around the city centre. These new developments have mostly been built by Lebanese or Chinese developers and investors, and are entering the market when demand for new space is subdued.

## Retail Market

While the retail market in Gabon remains dominated by small-scale and informal retailing, more modern and larger scale operations have steadily been introduced to the country. There are few international retailers in Libreville although a franchise of the French supermarket Géant Casino operates at Centre Commercial Mbolo. The main market in Libreville, Marché de Mont-Bouët, is due to be replaced by the Grand Marché de Libreville which will provide better quality market stalls alongside more modern retail units, but work on the new facility has not yet commenced. Gabon is among eight African countries identified as targets for development by CFAO/Carrefour.

## Industrial market

With the industrial market being impacted by the slowdown in oil-related activity, future growth may depend on the success of the government's drive to expand non-oil industries. However, the business environment in Gabon is challenging and the government's diversification strategy has so far been based on the granting of specific incentives to foreign investors. There is a special economic zone at Nkok, about 30 km east of Libreville, which was established as a partnership between the government and the Singaporean agri-business Olam. Much of the country's oil-related industry is based in the city of Port-Gentil, which is currently only accessible via air and sea. However, the first road link to the city, involving the construction of several bridges, is being built by the China Road and Bridge Corporation.

## Residential market

As with the office sector, the prime residential market is seeing new developments coming online at a time when demand is limited. Properties that would have previously been expected to re-lease easily once being vacated are now becoming much harder to lease and landlords are experiencing void periods. There is a shortfall of lower income housing, which the government has attempted to address by developing new units, but the number of units completed to date is well behind initial targets.

Stanbic Heights, Accra

# GHANA

## Office market

The recent downturn in the Ghanaian economy has reduced office space demand in Accra. Several new office properties have been completed in the CBD and Airport Area, with the largest new office building to enter the market in 2016 being Dream Realty's The Octagon (36,000 sq m). A number of the new developments due in the medium-term are for owner-occupation, but these will still result in the release of a significant amount of second-hand space. Asking rents remain relatively high but are coming under downward pressure due to rising vacancy rates and the limited number of tenants seeking space. The Accra market is expected to remain balanced in the tenant's favour for the next few years.

## Retail market

While the Ghanaian retail market is still predominantly informal, there are some major malls, particularly in Accra. A number of international retailers, largely from South Africa, have a presence in the market. Accra's first Grade A shopping centre was the 20,000 sq m Accra Mall, which is now ten years old. Subsequent openings have included West Hills Mall (27,000 sq m) and The Junction Shopping Centre (11,500 sq m), while pipeline projects include Actis/Mabani's mixed-use The Exchange. There are concerns that the Accra retail market is close to reaching saturation point, and new developments will be entering a challenging economic environment. In the short-to-medium term, retail development is likely to focus on secondary cities such as Takoradi and Kumasi.

## Residential market

Ghanaian housing has traditionally taken the form of low-rise accommodation but in larger cities such as Accra, where land prices have increased substantially in recent years, there are an increasing number of townhouses and apartment blocks. The trend to construct apartment buildings has been driven by the mid-to-high income groups in Ghana, with this type of property being seen as a good investment vehicle. The economic boom earlier in the decade encouraged high levels of development, and the market now suffers from oversupply. Prices are generally falling, but good quality product priced at a level that provides developers with a reasonable profit margin will still sell well.

# KENYA

## Office market

Approximately 300,000 sq m of commercial office space was delivered to the Nairobi market in 2016, compared with an average of 150,000 sq m in recent years. The high levels of new supply have negatively affected rental levels and occupancy rates. This situation has been exacerbated further by external events that have caused some multinationals, particularly in the oil industry, to downsize their operations in Kenya. The take-up of new prime offices in Nairobi remains steady, however, with the city continuing to be the preferred location for global corporates looking to establish regional hubs serving East Africa's 150 million-plus population.

## Industrial market

Most of the stock in the established industrial zones of Nairobi and other major Kenyan cities remains outdated and of poor quality, and industrial areas suffer from heavy traffic congestion. Modern well-configured logistics space is currently scarce in spite of growing demand for high specification facilities, and this has led to some occupiers developing their own space. Rising demand in this sector has prompted the emergence of several master planned industrial parks, particularly on the outskirts of Nairobi where developers are taking advantage of new infrastructure developments, but construction is yet to commence on a large scale.

## Residential market

Approximately 100,000 sq m of formal retail space was delivered to the market in 2016, up from about 50,000 sq m in 2015. As a result of this new supply, it has taken longer for space to be let and prime rents have stagnated. Retailers from outside Africa are taking a growing interest in Kenya, with the most high profile recent market entrant being the French supermarket chain Carrefour, which has stores at both The Hub and Two Rivers Mall. However, the sudden rise in supply has stretched the capacity of local retailers to occupy the new space.

## Retail market

The residential sector remained stable throughout 2016, due to steady macroeconomic conditions and minimal impact from external shocks. Luxury home sales prices increased marginally, but prime rental prices declined as a result of a slight oversupply, which was partly attributable to the exodus of a large number of expatriates following the downsizing of Kenya's oil extraction industry. The Kenyan government estimates that there is a shortage of approximately 200,000 units per annum and is addressing the situation through measures such as slum upgrading and the provision of tax incentives for major developers.

Antananarivo

# MADAGASCAR

## Office market

The office market in Madagascar deteriorated after the coup in 2009, but greater stability followed the presidential elections of 2013, leading to a period of steady growth. The preferred office locations for multinationals are the areas to the north of the city centre such as Andraharo, Tana Waterfront, Ivandry and Ankorondrano. The last of these is home to Antananarivo's tallest building, the 33-storey Tour Orange, which was completed in 2013. The areas to the north are favoured over the city centre, as congestion and a lack of car parking make it unattractive to most companies. However, the majority of government and banking occupiers remain in the city centre.

## Retail market

The retail sector is largely informal, and Antananarivo is home to markets including the Andraovahangy craft market, the Petite Vitesse food market and the Analakely covered market. The areas around Avenue de L'Indépendance are the main focus for retail activity. As a relatively poor country, Madagascar offers limited opportunities for formal retailing, although there are supermarket chains including Shoprite, Jumbo Score and Leader Price. The most modern shopping centre in Antananarivo is the Shoprite-anchored La City which opened in Ivandry in 2012, while development projects include Filatek's Alhambra Gallery. Many international brands, including Gap, Ralph Lauren and

Zara, manufacture clothing in Madagascar, and this could open up opportunities for international retailers to enter the market. The island's location and history would suggest that these would most probably come from South Africa or France.

## Industrial market

The main industrial areas are located in the south of Antananarivo. There is a mixed-use area to the south of the city centre which mainly contains lower quality buildings, Madagascan businesses and airline companies. As it forms the main arterial route south of the city, the road in this area can become very congested. About 5 km to the south of the city centre, the Zone Industrielle Forello is the location of some of the heavier industries. Nearby is the Zone Industrielle Filatek Ankadimboaka, which is one of Madagascar's first free zones. There is also a small amount of light industrial activity just south of the airport.

## Residential market

The relatively low household income in Madagascar means that most people cannot afford to purchase housing. The development that does take place is generally focused on the prime end of the market and the expatriate sector. These parts of the market were badly affected by the political instability up until 2013 but have since shown signs of recovery. Most high-end residential areas are in and around Ivandry to the north of the city centre, where many of the embassies are located.

# MALAWI

## Office market

The rental market has seen rising demand for small office space, but there has been a decrease in demand for larger offices. There is a general move towards modular office space that allows occupiers to downsize or increase space as the need arises. Annual rental escalations of 20% or more are common, in line with Malawi's high inflation rate. Lilongwe city centre has a shortage of high quality office space and no construction has taken place in recent years as a lack of infrastructure inhibits the development of vacant sites in central areas. However, five new office buildings are under construction and will be ready for occupation within two years, in parts of the city where infrastructure is in place. Office development and sales in Blantyre are both at a standstill due to the high cost of finance.

## Retail market

Demand for high quality retail space is tapering off due to the low purchasing power of consumers. The Gateway Mall in Lilongwe opened in December 2014 but it is not yet fully occupied. The mall was developed by MPICO Limited and is anchored by Shoprite. Lilongwe now has two large modern shopping malls and Blantyre has one, although several smaller malls have appeared in the past two years.

Generally, the traditional high street retailers continue to thrive.

## Industrial market

Electricity blackouts and water shortages have worsened to the extent that industrial production is now estimated to be at less than 50% of its capacity. However, demand for warehouses continues to be relatively strong, and is dominated by industrial users requiring logistics and storage space. Warehousing rents have thus maintained comparatively high levels. Investment transactions in this sector are negligible.

## Residential market

Although there is still a disparity between the cities of Blantyre and Lilongwe in terms of both rental and market values, this gap is being reduced by the indexation of rents to the US dollar, especially for high quality properties. Lilongwe now has a surplus of representational residential properties, for which rents are quoted in dollars, due to a reduction in demand from the international donor and business communities. Other tenants are moving into smaller and less expensive accommodation in medium density areas where rents are quoted in the local currency. Residential sales have slowed down due to the difficult economic environment.

# MALI

## Office market

In the five years since the coup d'état of 2012, the Bamako office market has struggled to grow and the supply of quality offices remains very limited. The initial improvements in the economic, political and security environment immediately after the coup d'état were short lived. There are significant risks to the outlook, most notably Mali's fragile security situation. Setbacks to the country's improving security, especially in Bamako, may dampen any economic recovery and further stifle office demand and new supply. What little demand there is for offices comes from the banking, telecommunications, government and NGO sectors. Prime rents are currently stable at US\$19/sq m/month, but rental levels fall away dramatically outside the CBD to around US\$6/sq m/month.

## Retail market

The continued high security risk has hindered the development of the Bamako retail market. Mali has fallen well behind other West African countries such as Côte d'Ivoire, Ghana and Senegal, where modern retail malls have been developed in recent years. Retail activity in Bamako continues to be generally informal and based around street trading, with the Marché Rose and Street Market in the city centre being key locations. The most modern retail provision is to the west at ACI 2000, where there are also a number of showrooms.

## Industrial market

The industrial market continues to be based around local tradesmen, with no

international manufacturers in the city. The main industrial zone is to the east of the commercial centre, and the availability of good quality storage and logistics warehousing is minimal. As much as 80% of the Malian workforce is employed in agriculture, with cotton being one of the country's largest exports. Mining is also an important sector, and both areas have potential for growth should political stability be achieved. If the market stabilises, there should be opportunities for logistics companies and developers, particularly where they hold land in inner city zones, as the continued expansion of Bamako is resulting in higher land values in central areas.

## Residential market

The high-end residential market has been hit hard over the last two years. The continued security woes have led to lower demand from NGOs and company executives, resulting in a significant downturn in rental levels. Property owners have had to compete to attract interest from the diminishing number of occupiers in the market for high quality residences. There is stronger demand for lower value housing, particularly because Bamako is growing at a fast pace as many rural Malians are choosing to move to the relative safety of the city. This increased demand for houses is largely being satisfied by the public sector, with government-built housing units significantly outnumbering those built by private developers.

# MAURITANIA

## Office market

Aside from the diplomatic sector, the oil and mining industry has historically been the main source of international demand in the Nouakchott office market. However, the market is currently quiet with oil and mining companies putting expansion plans on hold and cutting costs due to low commodity prices. Glencore abandoned its Askaf iron ore project in 2015 while Kinross has scaled back its plans for the Tasiast gold mine. Some international businesses operating in Mauritania, including Kinross, have based themselves offshore in the Canary Islands. It is difficult to find good quality offices in Nouakchott, and Al Khaima City Center remains arguably the city's best commercial building, approximately ten years after completion.

## Retail market

As a sparsely-populated country of around four million people, Mauritania is not an obvious target for international retailers. However, a large ATAC supermarket, a brand of the French retail group Auchan, opened in 2015 operating under franchise. The main shopping malls in Nouakchott are at the Al Khaima Center and Mauricenter, but these are relatively small and basic. Other supermarkets around the city include Sky Rim and Salam. The large supermarket unit fronting the Ribat Al Bahr development to the north of the city has never opened for business. The prime high street retail location is the Avenue du General de Gaulle, while the largest market for local shopping is the busy Marché Capitale.

## Industrial market

Mauritania's reputation for having an opaque tax and import/export regime has inhibited the entry of international businesses. The country is commodity-rich being Africa's second largest exporter of iron ore and with good reserves of oil. However, the collapse of global commodity prices has caused these sectors to contract. In Nouakchott, the main industrial zone closest to the city is at El Mina, which mainly comprises local businesses operating out of older, owner-occupied facilities. Further out of the city, there is heavier industry including cement production, at the Zone Industrielle du Wharf and Port de l'Amitié. Assisted by the World Bank, a free zone has been created at the port in Nouadhibou.

## Residential market

The ambitious Ribat Al Bahr urban development project north of Nouakchott, which was first announced in 2010 as capable of housing 50,000 people, remains unbuilt. Nonetheless, future development at the top end of the market is likely to be concentrated on areas to the north of the city. The upmarket expatriate housing area of Tevrah Zeina is located in the north of Nouakchott and, beyond this, there is an area of former green belt land where development has been encouraged in part by the opening of the new University of Science, Technology and Medicine and Oumtounsy International Airport.

Barkly Wharf, Port Louis

# MAURITIUS

## Office market

The traditional CBD of Port Louis centres on locations such as the Waterfront, Edith Cavell Street, Pope Hennessy Street, La Chaussée and Royal Road. The Waterfront, which includes Barkly Wharf, commands the highest office rents, at nearly double the level of other parts of the CBD. Mauritius' second major office location is the relatively new Cyber City business park at Ebene, about 10 km to the south east of Port Louis. Office rents in this location are at similar levels to the CBD, but in newer buildings with better parking availability. The government is following the lead of the private sector, by relocating many of its downtown offices to Ebene. This may cause supply to increase in Port Louis, while availability falls in Ebene, pushing rents in the two locations in opposite directions.

## Retail market

Mauritius has a well-developed retail market, which includes both small local strip malls and larger regional malls. These include Grand Baie La Croisette, Cascavelle Shopping Mall, Trianon Shopping Park and Phoenix Les Halles. The largest shopping mall is the Bagatelle Mall of Mauritius, which is located south of Port Louis on the M1 near Ebene and is anchored by Monoprix, Intermart, Woolworths and Food Lovers Market. Since opening in 2011, it has been expanded from 130 to 155 stores, and it also includes a hotel and cinema.

## Industrial market

Due to the nature of the Mauritian economy, demand for industrial and warehousing

facilities is relatively low. Most of the existing stock is either owner-occupied or leased in small units. The Mauritian government continues to promote industries away from traditional sectors such as fishing, sugar cane, mining and cement production. It has further developed warehousing and freeport facilities around Port Louis and the airport. Private developers have taken advantage of land released around Riche Terre to construct warehousing, although to date most of this has been offered on a build-to-suit basis. Prices have shown little movement over the last couple of years.

## Residential market

The residential real estate market in Mauritius continues to attract high levels of investment, although foreign ownership is restricted to government-approved developments. High-end developers targeting wealthy foreign buyers need to ensure that their schemes are approved under the Property Development Scheme (PDS), which has replaced the previous Real Estate Scheme (RES) and Integrated Resort Scheme (IRS). Mauritian nationals are well served by multiple developments across the island and many of the former sugar plantations offer large tracts of land for master planned residential schemes. An increase in supply, combined with a slower global economy, has caused the market to see little growth in rents or prices over the last few years. However, the open, stable, low-tax environment means that the island continues to attract expatriates and investors.

# MOROCCO

## Office market

Casablanca is Morocco's main business location and its largest office market. The principal office districts are downtown, Sidi Maârouf and areas around the port including the massive Casablanca Marina development. An important emerging area is Casablanca Finance City (CFC), on the site of the former Casa-Anfa airport. Although there have been delays to its physical construction, international businesses such as Ford, AIG and BNP Paribas have been attracted by the incentives offered to companies granted CFC status. Office developments in the capital Rabat are generally Grade B low-rise buildings with little street setback. Office areas in Rabat include the city centre, Agdal and Hay Ryad, where a notable current development is Foncière Chellah's Mahaj Ryad Center.

## Retail market

There was practically no modern retail space in the country until the opening of the Morocco Mall (70,000 sq m) in 2011, and AnfaPlace Shopping Center (31,000 sq m) in 2013. A significant number of international brands have since entered the market, including H&M, McDonald's and Marks & Spencer. IKEA opened its first Moroccan store in 2016, at Zenata on the outskirts of Casablanca. The development pipeline includes Aksal's planned Mall of Rabat at Wessal Bouregreg. To support further retail development, the European Bank for Reconstruction and Development has invested €45 million in Vecteur LV, the real estate vehicle of Label'Vie, which operates the Carrefour franchise in Morocco.

## Industrial market

Morocco's relatively diversified economic base and advantageous geographic location make it well-positioned to become a major manufacturing centre for exporting to Europe and the rest of Africa. The government has been successful in attracting foreign investment and interest has been encouraged by a new investment law introduced in 2016 creating free zones across the country. Currently, industrial activity is concentrated in the Casablanca-Tangier axis, particularly in the regions of Casablanca-Settat and Rabat-Salé-Kénitra, and around the port of Tanger-Med. About 30 km from the port, Renault has the largest car factory in Africa. A new port is under construction at Safi on the Atlantic coast, which will provide a major new coal terminal and phosphate hub.

## Residential market

Figures from the Bank Al-Maghrib and Moroccan Land Registry show a significant increase in the number of residential transactions in 2016. This was driven by a rise in activity at the low-to-mid end of the market, supported by the increased availability of mortgage finance. The government has attempted to stimulate the construction of social housing by providing tax breaks and cheap land to developers. Despite this, Morocco has a shortfall of housing and there are several master planned new cities at varying stages of development including Zenata Eco-City, Victoria City at Bouskoura and Tamesna near Rabat.

Edificio 24, Maputo

# MOZAMBIQUE

## Office market

The new Downtown area of Maputo is now seen as the city's CBD and is the main focus for office development. Demand for space has been negatively impacted by the recent downturn in the economy, which deepened in 2016 when the IMF withdrew aid to Mozambique following the discovery of approximately US\$1.4 billion of previously undisclosed government debt. Low occupier demand combined with increased supply has led to prime rents slipping from US\$37.50/sq m/month in 2015 to the current level of US\$27.50/sq m/month. Prime rents are expected to remain around this level over the medium-term.

## Retail market

Despite economic headwinds, Mozambique's retail sector has continued to show steady growth over the last two years, driven by the expansion of the middle class coupled with an historic under-provision of formal retail space. In 2016, the Portuguese retail group Sonae in partnership with private fund Satya Capital bought the Extra supermarket chain, which had been owned by South Africa's Pick n Pay until 2013. Pipeline developments include Novare Matola Mall (19,500 sq m, phase one) and Marginal Mall (30,500 sq m) which will expand the site of the existing Game store on Avenida da Marginal into a fully-fledged shopping centre. Demand for retail space is stable and well-located units are usually readily leased at prime rents in the region of US\$28/sq m/month.

## Residential market

The residential market has been heavily impacted by the economic downturn. The rental apartment sector has been most affected due to a significant reduction in expatriate demand as a result of companies cutting their overheads. Rents for mid-to-high end apartments have fallen by more than 40% and are unlikely to recover in the medium-term as there is a large volume of new units due to come to the market. Rental villas at the top end of the market have been less severely affected and currently lease for US\$4,500-5,500/month, although rents drop to around 35-45% of this level on the local mass market.

# NAMIBIA

## Office market

Windhoek is a relatively small office market with steady demand for space. There is an ongoing shift in activity away from the CBD towards less central areas, where more modern offices with better parking are available. Popular non-CBD office locations include Mandume Park in the south of the city. Office rents have shown steady growth in recent years, but continued new development may lead to downward pressure, especially for space in older buildings. In the office investment market, demand from South African investors has helped to drive yield compression and capital value growth.

## Retail market

Despite having a relatively small population of just over 300,000, Windhoek has a significant volume of modern mall space. The largest shopping centres are Grove Mall (52,000 sq m), Maerua Mall (51,000 sq m) and Wernhil Park (38,000 sq m). With Windhoek being well-supplied for retail space, developers have been encouraged to build large-scale malls in other towns; for example,

Safari Development's Platz Am Meer (27,000 sq m) opened in Swakopmund in 2016, while Atterbury's Dunes Mall (25,000 sq m) in Walvis Bay is due for completion in 2017. Demand for larger retail units primarily stems from South African chains such as Spar, Pick n Pay, Edgars and Foschini, while the most prominent Namibian-owned supermarket operator is Woermann Brock.

## Industrial market

Windhoek has well-established industrial zones at the Northern Industrial Area, Southern Industrial Area, Prosperita and Lafrenz. Development is also taking place at Shali Industrial Estate, north of Windhoek. Logistics is identified as a priority sector by the government's Fourth National Development Plan (NDP4), and the country's geographical location gives it the potential to be a trade gateway for neighbouring countries including landlocked Botswana, Zambia and Zimbabwe. The Namibian authorities are keen for Walvis Bay to become the preferred port location on the west coast of Africa serving the Southern African Development Community area, and a port expansion is currently under construction by China Harbour and Engineering Company.

## Residential market

Figures from FNB Namibia suggest that average house prices in Namibia have more than doubled since 2010, but there are signs that the market is now cooling with demand impacted by weakening economic growth. At the prime end of the market, the most desirable locations in Windhoek include the suburbs of Eros, Ludwigsdorf and Klein Windhoek. High sales prices and rents are also commanded by luxury housing in the coastal resort of Swakopmund. Namibia has a shortage of affordable housing and serviced land, which is exacerbated by high levels of rural-to-urban migration.

Heritage Place, Lagos

# NIGERIA

## Office market

There is an oversupply of recently-constructed good quality office space in both Lagos and Abuja. Grade A rents have fallen in recent years, but there is pent-up demand partly resulting from companies' delayed decision-making, and this finally appears to be strengthening activity in Lagos. Two recently-completed projects are RMB Westport's Wings Office Complex (26,000 sq m) where Ericsson has acquired space and Heritage Place (16,000 sq m). Additionally, the first office building at the huge Eko Atlantic development is now complete and available for lease, having been purpose-built for the now-defunct Afren oil company. Within Abuja, the recent completion of the World Trade Center office tower has added to the supply surplus.

## Retail market

The slowdown in the Nigerian economy has not detracted from the huge opportunities that its burgeoning middle class are creating for retail development. Nigeria has continued to transition from informal market trading to more modern retail formats. Major developments planned or underway include the Eko Mall within Eko Atlantic which would potentially be the largest in West Africa, and Actis' proposed Twin Lakes Mall (50,000 sq m). The latter is rumoured to have Carrefour as its anchor tenant, thus breaking Shoprite's near-monopoly on the anchoring of Nigeria's modern malls. Developers have also targeted second-tier cities, with locations such as Onitsha, Ibadan and Warri seeing recent mall developments.

## Industrial market

The industrial sector has been hard hit by the rapid depreciation of the naira. Several multinationals have to some extent retrenched on previous growth plans, postponed capital projects or sought to sublease warehousing space. Major industrial development is almost entirely restricted to the south west of Nigeria in and around Lagos and neighbouring Ogun State. There are plans for the expansion of the market-leading Agbara Estate, while Lekki Free Trade Zone's viability as an industrial location should be enhanced by the development of a new gas pipeline. Rendeavour has recently acquired a site of approximately 10,000 hectares in the free trade zone.

## Residential market

There is a surplus of high-end residential space in Lagos, as a result of over-construction in the previous development cycle. The traditional high-end residential areas of Ikoyi, Victoria Island and Banana Island have also seen increased competition from Lekki to the east. Although Lekki remains heavily congested, master planned communities such as Victoria Garden City have grown rapidly. Within the luxury sector, Eko Atlantic had its first residents in 2016, at the Eko Pearl Towers, while the World Trade Center residential tower in Abuja also began to be occupied. Despite the slowdown in the sector, a significant number of luxury developments are planned, including Gracefield Island and Orange Island.

# RWANDA

## Office market

The supply of office space in Kigali has outstripped demand for the last few years. Over 50,000 sq m of new office space came to the market in the past year, with an additional 70,000 sq m in the pipeline for the next two years. The take-up of space is relatively slow, and the excess supply is putting downward pressure on prime rents. Kigali City Council is currently leading an urban regeneration drive in the CBD whereby old and low density structures are being demolished to make way for modern, high density commercial developments. As part of this strategy, tenants currently renting residential properties for office use are being encouraged to relocate to newly constructed offices. This will generate demand for some of the space currently on the market and in the pipeline.

## Retail market

The retail industry in Rwanda is currently dominated by local retailers, with a small number of regional chains from Kenya and South Africa having a presence, most notably Nakumatt and Mr Price. Retail businesses in Kigali are generally found in destination locations that are not necessarily convenient for the majority of consumers. These environments tend to lack aesthetic appeal, public access and leisure and entertainment facilities that would increase dwell times and revenues. However, Kigali's retail landscape is evolving with the advent of developments such as Union Trade Centre, Kigali City Tower, MTN Centre,

CHIC Complex and M-Peace Plaza, and consumer habits are starting to change.

## Industrial market

Rwanda has only a small industrial base, but the government has ambitions to turn it into a regional centre for trade, logistics and manufacturing. A major part of these plans is the Kigali Logistics Platform, a dry port which is due to be developed on a site at Masaka near Kigali. DP World has been granted a 25-year concession to develop and operate the facility. The government has also signed a deal with Alpha Logistics for the construction of a modern bonded warehouse at Petit Barrière, on the border with DR Congo.

## Residential market

There has been an increase in the number of apartments and houses coming on to the rental market, and demand for such accommodation is strong. Increased interest in residential rental accommodation has been observed from the expatriate community, with Gacuriro and Kagugu being particularly popular due to their affordable rents and modern housing stock. In the residential sales market, the majority of enquiries stem from indigenous Rwandans seeking houses in the US\$50,000-100,000 range, in locations such as Nyamirambo, Gisozi, Kibagabaga and Kagugu. The prime residential pipeline in Kigali is active with a number of developments scheduled for completion in 2017 including Ridgeview Court, Karibu Homes and Serene Crest Apartments.

Focus One office building, Dakar

# SENEGAL

## Office market

In Dakar, businesses tend to prefer either Plateau or the areas to the north at Les Almadies and Point E. In general, office market activity has shown a shift northwards, particularly when involving international companies. However, demand is relatively flat, and international requirements tend to be small, typically 400 sq m. Larger requirements generally come from the banking and telecoms sectors. Supply and demand are relatively balanced, resulting in almost no rental growth for the last decade. However, this now makes Dakar appear relatively inexpensive and in a similar position to that which the Ivorian capital Abidjan was in two years ago before its recent rapid growth. There are ambitious plans for the development of a new city at Diamniadio, 30 km east of Dakar, and this is likely to become an increased focus for activity across all property market sectors.

## Retail market

The Dakar retail market is relatively undersupplied, with only two major upscale developments, Sea Plaza and Dakar City. These malls are both anchored by Casino and between them offer a total of around 20,000 sq m GLA. International brands in the Dakar market include Benetton, Mango and Guess. There are small supermarkets throughout the city, the most ubiquitous being those of the Spanish group, Citydia. Additionally, the city has some boutique shopping, historically centred on Rue Jules Ferry in Plateau. Retail rents are relatively flat and have fallen well behind those of the other

large Francophone West African markets of Côte d'Ivoire and Cameroon.

## Industrial market

Compared with many other West African cities, the industrial market in Dakar is fairly stagnant. Over the past five years, there has been little interest in Dakar from international manufacturers and many of the international businesses that are in the city have been scaling back their operations. Small-scale local industrial activity is found throughout Dakar, but the prime area for bigger businesses is the port. Most industrial property is owner-occupied and there is practically no speculative development in this sector.

## Residential market

Residential development in Dakar is generally on a small scale, typically up to 20 units. There is a market for well-priced apartments in small blocks and developments such as O2 and Ocean Drive have performed well. A key to the success of schemes is the willingness of owners to lease, as well as sell, units. Progress at the larger-scale Waterfront development has continued to be relatively slow, and no further similarly-sized schemes are likely to be commenced until it is completed and sold. Away from the seafront, the market is comparatively buoyant, although prices drop from up to CFA1,500,000/sq m to around CFA500,000-650,000/sq m at developments such as Mixta/ARM's Residence de la Paix.

# SOUTH AFRICA

## Office market

Despite relatively weak economic growth in 2016, South African office markets recorded above-inflation rental growth and vacancy rates were broadly stable. In Johannesburg, vacancy rates are relatively high in the CBD and new development is largely focused on the Sandton and Rosebank nodes, particularly in locations within easy reach of stations on the Gautrain rapid rail line. The largest projects in the pipeline are office buildings under construction for Discovery (87,000 sq m) and Sasol (67,000 sq m). In Cape Town, vacancy rates are low at the V&A Waterfront and offices in this location command a premium over the CBD. The Century City node remains an important focus for new development in Cape Town. Office investment volumes were moderate in 2016, with many South African investors preferring to pursue overseas opportunities as a hedge against the weak rand.

## Retail market

The Mall of Africa (131,000 sq m) opened in 2016 as part of the ambitious Waterfall City development, located between Johannesburg and Pretoria. A significant volume of additional new retail space is in the pipeline, which will add to South Africa's existing mall stock of more than 23 million sq m. Although there are some concerns of retail oversupply, the sector has generally performed well. The next few years may see a shift in developers' focus towards smaller neighbourhood shopping centres, rather than large regional malls. International brands such as H&M, Zara,

Cotton On and Forever 21 have expanded their South African presence in recent years, providing increased competition to domestic retailers.

## Industrial market

The South African industrial market is experiencing an ongoing shift in activity away from heavy manufacturing towards warehousing and distribution, and developers are focused on the delivery of high quality logistics space. In Gauteng, development activity is largely concentrated towards the north and east of Johannesburg in locations such as the Lords View Industrial Park, while the Waterfall City project also includes substantial logistics property elements. Over the longer term, the Ekurhuleni Aerotropolis project around OR Tambo International Airport may prove to be an important catalyst for industrial property development.

## Residential market

South African house price growth slowed in 2016, reflecting the more subdued economic backdrop. However, the major coastal cities of Cape Town, Port Elizabeth and Durban outperformed inland markets. This trend was driven in part by demand from domestic buyers relocating to the coast from inland cities for lifestyle reasons, with locations in Cape Town and along the Western Cape coast generally attracting the strongest interest. The housing market should be boosted by a moderate improvement in economic growth in 2017, although a cut in interest rates appears unlikely in the immediate term.

# TANZANIA

## Office market

Dar es Salaam is the commercial capital of Tanzania and its CBD remains at the heart of office market activity. Significant new office development projects within the CBD include Mzizima Towers and the Tanzania Ports Authority HQ building. There are also office development projects outside the city centre, particularly along Ali Hassan Mwinyi Road and Bagamoyo Road. Such developments include Jangid Plaza, Fakyat Tower, Morocco Square and Paloma Park. Despite the increase in supply, office rents remain relatively high and vacancy rates are low.

## Retail market

The retail market in Tanzania has steadily grown over a long period, largely through small-scale retail outlets operated from residential buildings and small downtown specialist shops in National Housing Corporation buildings. Such outlets compete with ad-hoc street trading known locally as "Wamachinga", which can sometimes be found on a massive scale in areas such as Kariakoo and Manzese. There are a number of large-scale modern retail malls located in areas such as the city centre, Oyster Bay, Msasani, Mbezi Beach and Mikocheni, and several larger retail schemes are planned. Rock City Mall, in the city of Mwanza, is also now operational. However, some large retailers have closed their Tanzanian operations, including the Kenyan supermarket chain Uchumi and South Africa's Shoprite. The Kenyan retailer Nakumatt, which took over Shoprite stores in Tanzania, is reported to be struggling in the country.

## Industrial market

The prime industrial areas of Dar es Salaam are located on Nyerere Road and Mandela Road, and have good transport links to the harbour, international airport and the interior of the country. There are secondary industrial locations in Chan'gombe, Mikocheni, Mwenge and Ubungo. The port of Dar es Salaam is a gateway for goods destined for landlocked countries including Malawi, Zambia, Rwanda and Burundi, therefore logistics companies have significant demand for warehousing space for goods in transit. As part of a government initiative to focus on industrialisation, public corporations such as pension funds have been instructed to invest in industrial activities, and this is expected to stir up the market for industrial premises.

## Residential market

Dar es Salaam's high-end residential market is concentrated to the north of Salender Bridge, across the entire Msasani Peninsula and extending northwards to Mbezi and beyond. The most exclusive residential area is Oyster Bay at the southern base of the peninsula. At this end of the market, demand is dominated by diplomats, government executives and high net-worth individuals. The middle market is much less well-defined, with pockets of middle-income housing spread fairly evenly across the city. Within central Dar es Salaam, the Upanga neighbourhood is a well-established residential area offering good quality accommodation mainly in apartment blocks, and it is the preferred location for the Asian community.

# TUNISIA

## Office Market

Office market activity in Tunis is generally focused on a few key districts of the city. Belvédère and Montplaisir in the downtown area are mainly home to government departments, banks, medical centres and small Grade B offices. Planned commercial districts such as Urbain Nord and Les Berges du Lac I and II are to the north east of the downtown area and offer modern buildings in secure pleasant environments close to the city centre and airport. Construction activity has slowed noticeably over recent years due to limited occupier demand, a lack of bank liquidity and concerns about the economy. Although rents have remained stable through this period, the lack of new supply has caused vacancy rates to fall, and rents are expected to rise in the near future.

## Retail market

There has been limited new retail development in Tunis, with the exception of the Tunisia Mall in Les Berges du Lac II which opened in 2015. This 80-unit centre features several foreign brands including Massimo Dutti, Zara, Mango and Pull & Bear. An extension known as Tunisia Mall 2 is under construction and will be connected to the original centre by a tunnel. Despite difficult economic conditions and inflationary pressures, retail market sentiment is generally positive and chains such as Carrefour Market, Monoprix and MG Maxi have continued to expand across Tunisia.

## Industrial market

Tunisia has traditionally been seen as a low-cost manufacturing location for mainly French and Italian companies, although local manufacturing has grown due to increased infrastructure spending and restrictions on foreign companies operating in Tunisia. Limited industrial property development and moderate occupier demand have kept the market balanced in recent years. The majority of properties are either owner-occupied or small units serving the local market. Most industrial zones are to the south and west of Tunis, including Mghira where a large labour pool and modern warehousing attracts local and multinational occupiers. Newer industrial zones are being developed in locations close to the city including Manouba and Zaghouan.

## Residential market

The prime residential areas in Tunis are generally located to the north and east of the city centre and include Les Berges du Lac I and II, Carthage, Notre Dame and La Marsa. The residential market showed strong growth between 2010 and 2015, with demand boosted by a lack of alternative investment opportunities for Tunisians and by Libyans leaving their own country's troubles. More recently, activity has slowed due largely to restrictions on borrowing and an easing of demand from foreign investors. Prices for high-end residential property have held up more strongly than the wider market, partly because wealthier buyers are less sensitive to borrowing restrictions.

Mirembe Business Centre, Kampala

# UGANDA

## Office market

Demand for office space in Kampala picked up in the second half of 2016, particularly for Grade A/AB offices. However, Kampala remains a tenant's market against the backdrop of rising vacancy rates in the Grade B/C segment. Demand for better quality space largely stems from multinational companies and government organisations seeking modern, energy-efficient buildings with ample parking away from the congested CBD. Oil and gas companies have increased their operations in Uganda following the issuance of production licences in 2016, and are considering increasing their office space. This is likely to positively impact demand for prime offices in the medium-to-long term.

## Retail market

The retail sector had an unsettled 2016, with several leading retailers running into difficulties. However, increased footfall was recorded in a number of leading malls and many shops continued to trade well, particularly international-branded stores targeting middle-to-upper income consumers. A significant new shopping centre is the Imperial Mall, which opened in Entebbe in December 2016. The development pipeline includes the Arena Mall, a 15,000 sq m centre on Nsambya Road in Kampala, which is currently in the final pre-letting stage with earthworks due to commence in H1 2017. Leasing has also commenced on the proposed 42,000 sq m Kingdom Kampala development, and this has the potential to revitalise the Kampala

CBD following the recent trend for retail activity to drift towards suburban locations.

## Industrial market

The traditional industrial areas in the Kampala CBD and its outskirts, such as Banda, Ntinda, Nakawa and Kyambogo, saw subdued leasing activity in 2016 and occupancy rates are fairly low. The supply of space outstrips demand, and a slowdown in trade has reduced the need for warehousing for goods and commodities exported to neighbouring countries. However, demand has increased for relatively large warehouses in areas along the Entebbe-Kampala highway, where interest stems from logistics and transport companies and UN agencies, due to the proximity to Entebbe International Airport.

## Residential market

The residential lettings market was relatively slow in 2016, although activity increased slightly in the final quarter. Demand for prime rental accommodation mainly came from those working in the oil and gas, diplomatic and corporate sectors. Residential sales activity was dominated by the transaction of properties in non-performing loan portfolios of various banks. Increased demand has been registered in prime locations, with apartments attracting stronger interest than standalone houses, partly because they are perceived as being more secure. Prime residential development activity has increased and is mostly focused on rental properties with two-to-four en-suite bedrooms. The prime locations for development are Kololo, Nakasero, Bugolobi and Naguru, which are all in close proximity to the CBD.

# ZAMBIA

## Office market

Lusaka is a growing commercial hub with office space demand primarily stemming from the financial and communication sectors. An oversupply of Grade A space has placed downward pressure on rents, as well as providing more choice for occupiers. The economy was relatively sluggish in 2016, largely due to low copper prices, but a return to better economic growth is expected from the second half of 2017, which should result in increased demand. The prime location is the emerging Great East Road/Thabo Mbeki Road node in the immediate vicinity of the East Park Mall and Arcades Shopping Centre.

## Industrial market

The logistics and industrial sector is one of the most consistent-performing property market sectors in Lusaka, with strong demand for warehouse space supported by the growth of the retail, food and beverage and agricultural industries. While warehouses with low quality specifications still attract good demand, in the long run pressure on Lusaka's transport infrastructure combined with the demand for increasingly sophisticated logistics properties will result in a shift away from the existing industrial area to emerging hubs elsewhere around the city.

## Retail market

Over 90% of Zambia's modern shopping mall space is in either Lusaka or the towns of the Copperbelt, with approximately 250,000 sq m of existing retail space in these locations. As a result there are opportunities to develop formal retail centres in expanding towns around the rest of the country. The recently opened Kafue Shopping Mall, anchored by Pick n Pay, highlights the demand for niche malls in other towns, from both shoppers and retailers. Competition for customers and retailers is expected to intensify between the shopping malls in Lusaka, however Zambia's fast-developing property market is proving to be a resilient and risk-tolerant long-term investment destination.

## Key facts

<b>Population</b>	16.2 million
<b>Major cities:</b>	
Lusaka	2.2 million
Ndola	0.5 million
Kitwe	0.5 million

## Office market

Zimbabwe is suffering from economic and liquidity challenges which have stagnated office market activity. Supply is higher than demand and tenants are voluntarily surrendering space. Office buildings in the Harare CBD have void rates in excess of 50%, making them unattractive investments. Suburban offices have become more sought-after investments, due to their lower void rates, but there continues to be few sales transactions. To reduce vacancy levels, some CBD landlords are converting office space to shops, while others are partitioning floors into smaller suites. Given the challenging market, no new multistorey buildings have been constructed in the last twenty years.

## Retail market

Demand for retail space remains high. However, empty units in the CBD have become visible and vacant space is taking long to lease. Retailers face stiff competition from street vendors who sell their goods on shop pavements. The construction of new suburban shopping malls such as the Mall of Zimbabwe and the Gunhill Mall has been shelved in light of the country's poor economic outlook. Nonetheless, demand for prime suburban retail space remains buoyant and there are high occupancy rates in this sector. Prime rents are currently higher for suburban retail space, at US\$25/sq m/month, compared with US\$20/sq m/month in the CBD. Investors are holding

on to their retail investments, with Riverside Walk being the only suburban shopping mall that has been sold since 2015.

## Industrial market

The continued decline of the economy has led to several manufacturing companies closing operations. Very little foreign direct investment has come into the country as a result of the government's indigenisation policies, the high cost of capital and socio-political instability. This has led to an oversupply and underutilisation of industrial space. The sector is therefore characterised by high vacancy rates, declining rents and the voluntary surrender of leased space by tenants. A number of investors in this sector are looking to disinvest, but there is little or no demand except from a few owner-occupiers.

## Residential market

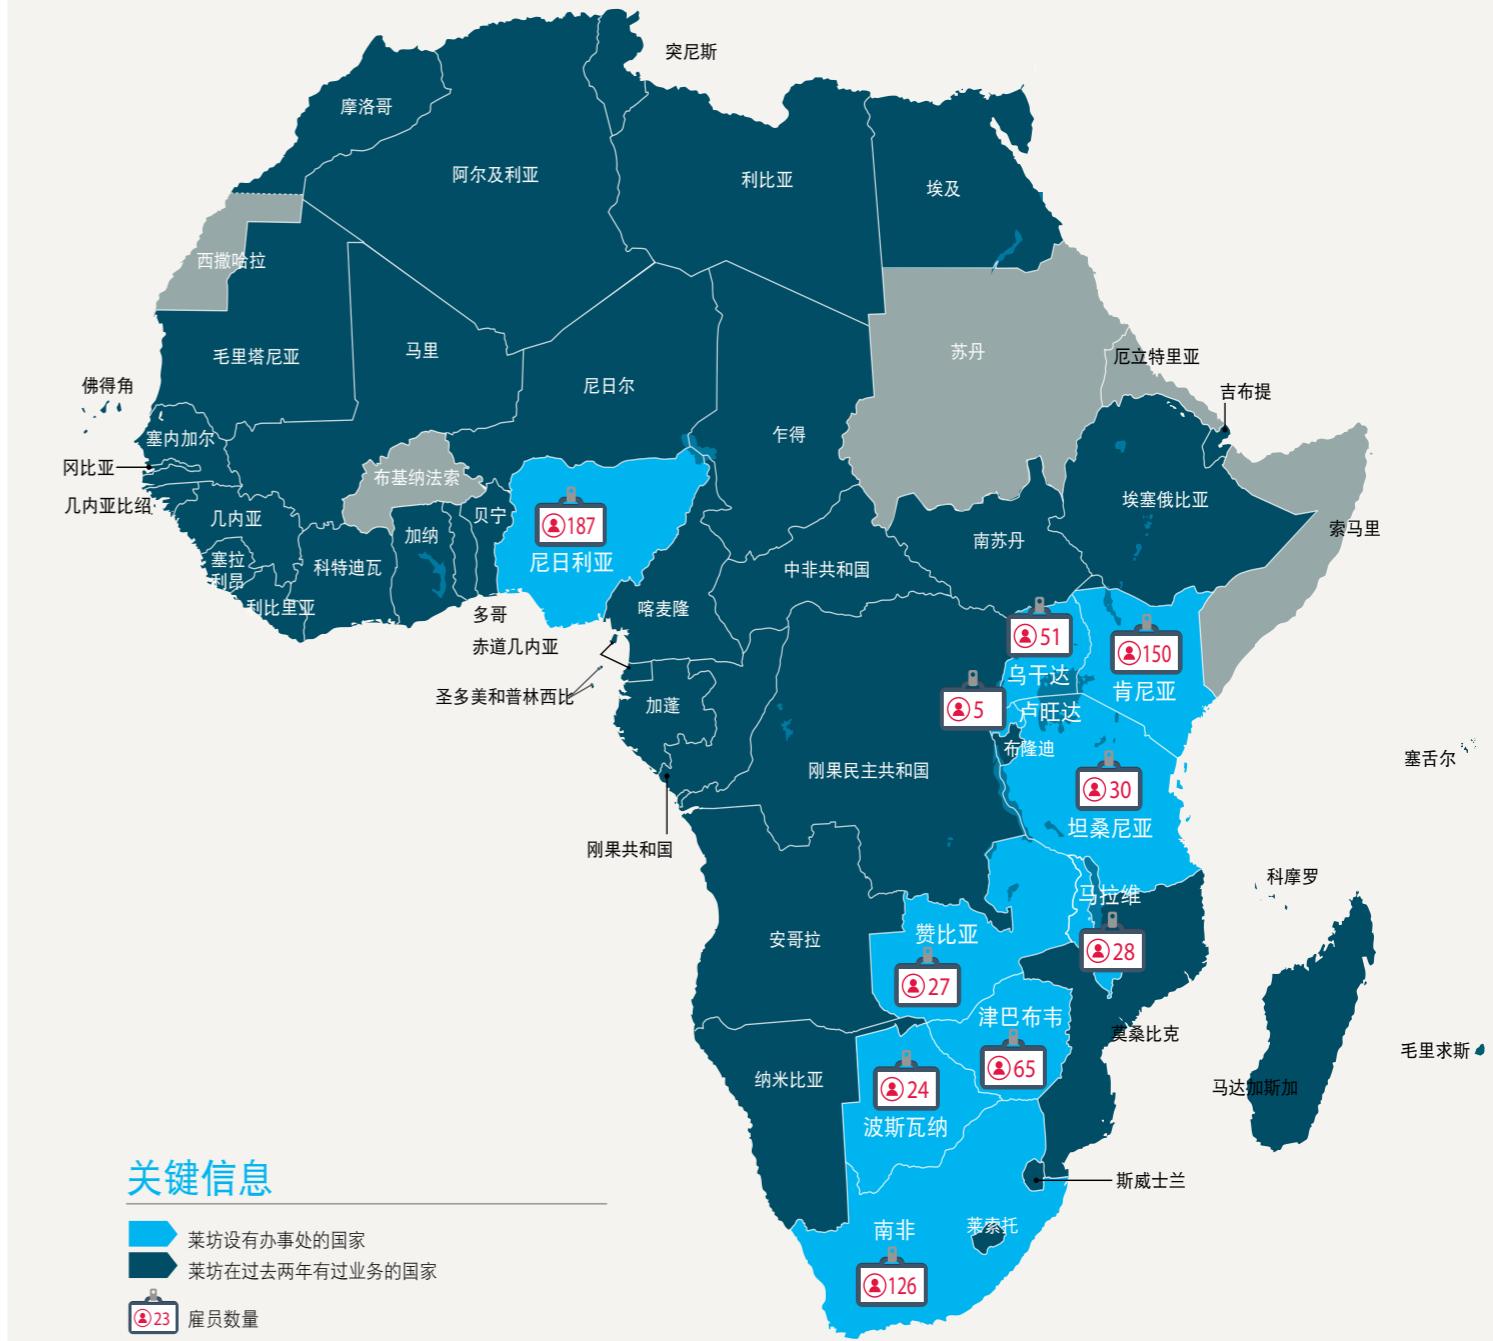

Residential market transactions are being slowed down by the lack of mortgage finance to assist buyers. Most transactions are therefore on a cash basis, and the majority of the population does not have the necessary funds to be able to buy property. Low disposable incomes and poor liquidity have depressed rental levels and reduced property prices. Therefore, no major speculative housing developments have been built in recent times, and the few attempts to construct such projects have failed. The limited available new stock has mainly come from self-build projects and housing cooperatives.
